# 1. Standard Accessories

(1) BOOX Device	x1
(2) Type-C Cable	x1
(3) Quick Start Guide	x1
(4) Warranty Sheet	x1

Optional Accessories (purchased separately)

- (1) Adapter
- (2) Protective case

**(Note: The E-books in the following illustration are not pre-stored)**

## 2. Safety Guide

Please read the Safety Guide carefully before you start to use the device.

Contact your BOOX retailer if you have any technical problem, or you can dial our official service line at 4008-400-014 or 4008-860-830.

### Screen protection

The device is equipped with E-ink screen, which is very fragile. Please have no shocking, squeezing, pressing against the screen, or dropping the device from a higher place. If the screen is already broken, stop using it and contact the professional or other qualified staff to replace the screen for you. Please don't dismantle the device without our permission.

### Standard accessories

Only the battery, adapter, and other accessories meeting our standard safety rules can be used for the device. For details, please refer to Product Specification. We will not be responsible for any damage caused by incompatible accessories.

## Stay away from liquids

The device is not waterproof. Don't expose the device to a humid environment or use it in the rain. Please keep it away from any corrosive liquids.

## Don't dismantle the device

Please don't dismantle the device in case of any damage.

**Inappropriate battery model may cause explosion. Please contact official after-sale team for battery replacement if needed. Users shall undertake the responsibility and deal with the obsolete battery if users replace batteries themselves.**

## Using environment

The using environment of the device is 0° C-50° C.

## 4. Main Interface

The main interface contains a system bar, content area, and function area.

The function area contains certain modules.

Double-click icons in function area can return to the main page of the specific module.

## System Bar

This section displays the current state of the device, including: Time, Notification, Refresh Mode, Wi-Fi Connection, Battery Usage. It is only for status indication.

Split Mode (default):

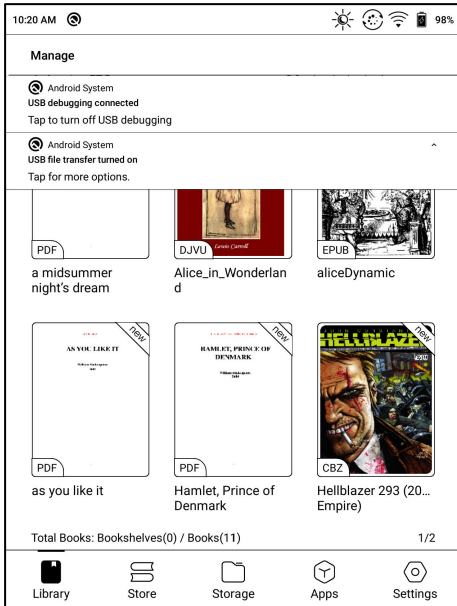

Pull down " Notification Center" from the left side and pull-down Control Panel from the right side.

Classic Mode:

Pull down both Notification Center and Control Panel in the same time.

# Notification Panel

This center contains information such as USB connection notification, third-party push notification. Tap the notification to jump to the corresponding app.

# Control Panel

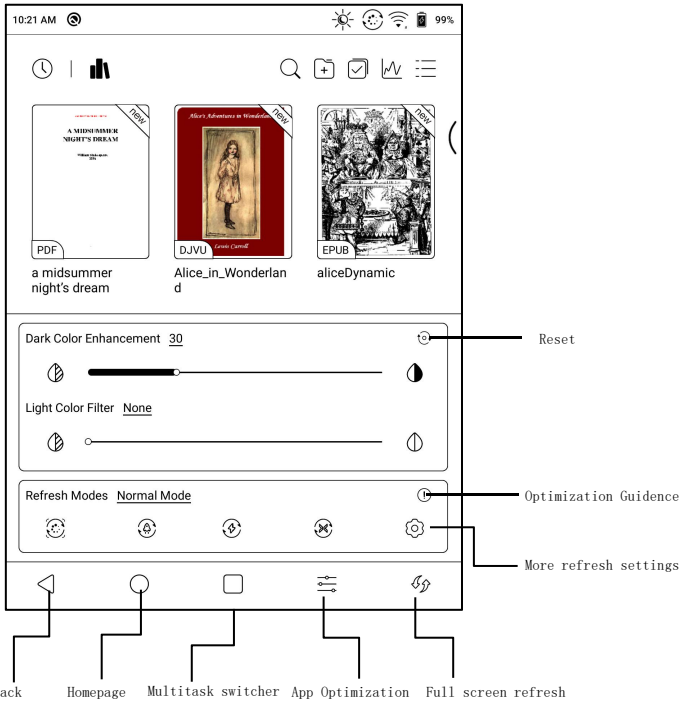

This panel contains Date and Time, Wi-Fi, Bluetooth, E Ink Center , Brightness adjustment, Volume adjustment. The above-mentioned items are permanent and cannot be removed or edited.

Screen orientation, Hand Touch On/Off, Screen Record, BooxDrop, and Feedback are optional items. You can edit them.

# E Ink Center

Open it from Control Panel or swipe up from the bottom to open it. This section includes Dark Color Enhancement, Light Color Filter, Refresh Modes (System), Shortcuts...etc.

## Refresh Modes

The system-level Refresh Mode takes precedence over the application Refresh Mode. That is: when the system is set to the Normal Mode, the application uses its own refresh settings; When the system is set to the other modes, the applications will use the system's refresh mode.

There are 4 Refresh Modes:

**Normal Mode (Default):** Good display effect, suitable for ordinary text reading.

**Speed Mode:** Slight ghosting and aliasing effect, suitable for thumbing through eBooks with text and images.

**A2 Mode:** Slightly heavier ghosting and aliasing effect, suitable for browsing images and text by quick sliding.

**X Mode:** Heaviest ghosting and aliasing effect accompanying detail loss, suitable for browsing websites and video playback.

Use A2 Mode by default for scrolling

After you change the Refresh Mode, you can change contrast for a better

display effect.

The color model does not support X Mode.

## Dark Color Enhancement

You can deepen the darker color of the page to black, which is generally used to enhance the foreground color, or the light-color page that needs to be darkened such as color icons, PDFs with poor scanning quality, etc. ;

## Light Color Filter

This can dilute the lighter-color page to white. It is generally used to bleach the background color;

## **Wi-Fi Setting**

When using at the first time, you should enter into the Wi-Fi setting interface to get a accessible connection. Then click the icon to turn on/off the auto connection.

## **Bluetooth Setting**

When using for the first time, you should enter into the Bluetooth setting interface to match a device you want. The matched earphone, page turner can be auto-connected by clicking the icon. Certain devices do not support auto connection after disconnected.

## **Rotation**

Easily change the orientation of the screen by clicking the direction you want.

## **Function Area**

The function area includes Library, Store, Storage, Apps, and Settings.

The default Homepage is Library. Double-tap the Navigation Ball to return to the Homepage

Users can go to Settings / More Settings to set any of the other function pages as a default Homepage.

## **Content Area**

The contents are sorted by time by default. The contents includes the following items.

### **Library**

All books in supported format from internal storage are displayed here.

The scanning path can be modified via Library Settings.

## **Store**

Enter into an online eBook store. Users can view more book information and make a purchase. Purchased books will be added to the list of Library.

## **Storage**

All folders from internal storage will be displayed here. Users can manage documents and folders from the page.

## **Apps**

All third-party apps are displayed here. Users are allowed to manage or optimize the apps.

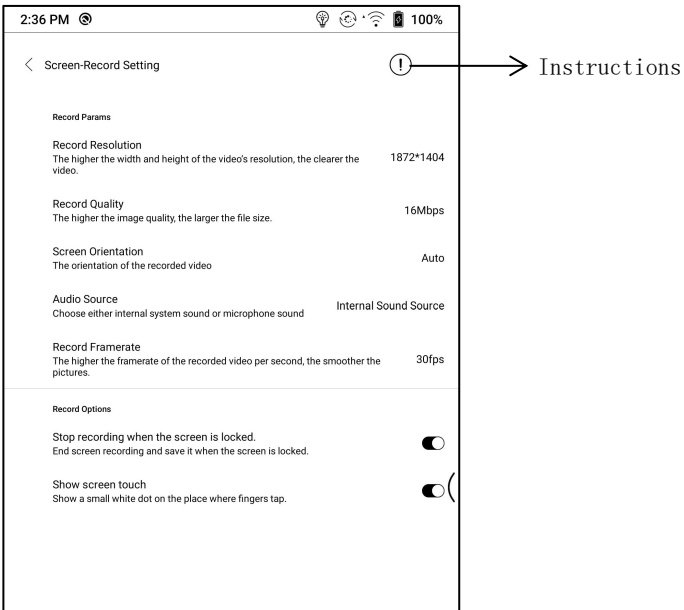

## **Settings**

The list of system settings help to manage the device.

## Screen Record

Long press Recording button on the screen to enter the Screen Recording settings. You can customize Resolution, Image Quality, Screen Orientation, Sound Source, etc. ;

When you use Screen Recording for the first time, you are recommended to adjust the relevant settings first.

Tap the Screen Record icon to open the floating window of screen recording.

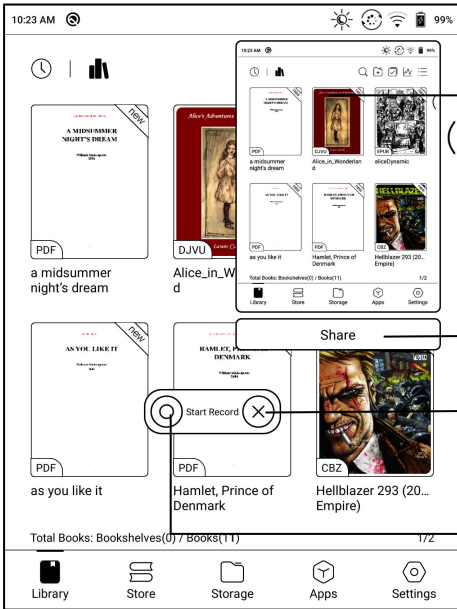

Tap the “Start” icon to start recording and tap the Close icon to stop recording;

After you stop recording, there will a thumbnail displayed in the upper right corner, and you can tap it to play or share; Long press the floating window to drag it around on the screen. The floating window will not be recorded into the video;

After the Screen Record is enabled, the floating window will always stay on the upper layer of the screen. You can create new screen recordings continuously. If you need to close it, you can manually tap X to close it.

The Recordings’ format is MP4 and the save path is:

Storage/Movies/Captures

Preview

Share

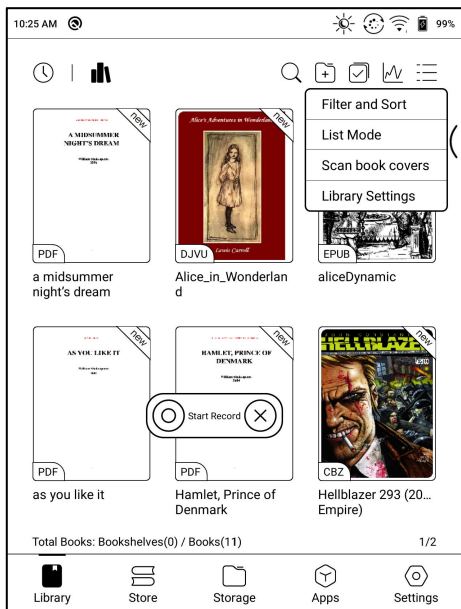

Close

Start / Pause

## 5. Library

The library only displays E-book documents in supported formats in the storage. Book cover thumbnail is displayed by default. E-books are sorted by the creation time.

On the upper right working area of the Library, users can search, create a new bookshelf, manage books in bulk, check Reading Statistics, pop up the drop-down menu (including Filter, Refresh Library, Scan Covers, Library Setting, Switch to List View)...etc.

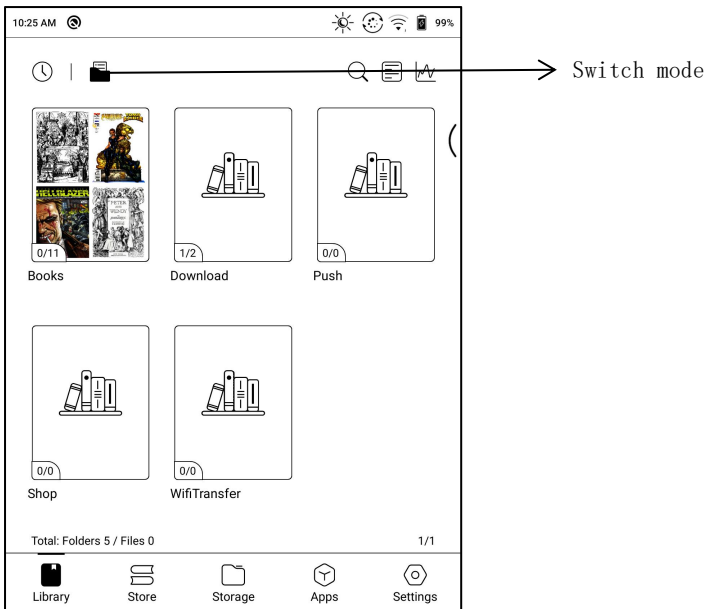

## Library Display Switch

Click on these icons to switch the library display. By default, it auto-scans and loads all the supported documents in specified paths, sorted by a specified way.

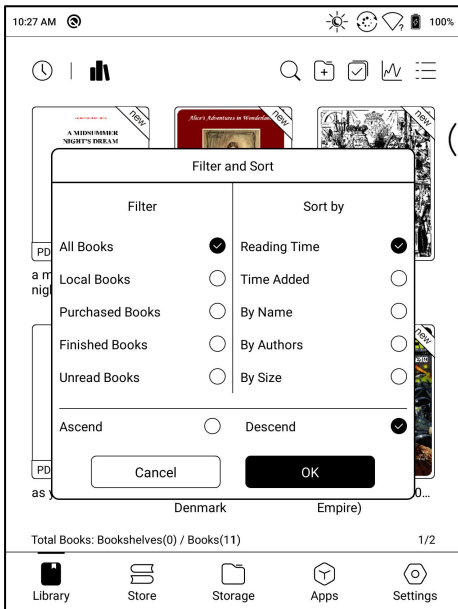

Another one is to display the content based on the structure of storage.

The icons change after clicking on it.

## Filter & Sort

By default, it shows all books in descending order.

## Refresh Library

“Refresh Library” gets all documents in supported formats scanned and rebuild library list. This function does not delete the reading history.

## Library Settings

It supports custom scan path. You can set certain storing path as Automatic Scan;

After the scan path is set, the Library will be reloaded. The books that are not in the scan path will be removed. If you need to read the books, you can find the original file in the storage;

## Sub-library Attribute

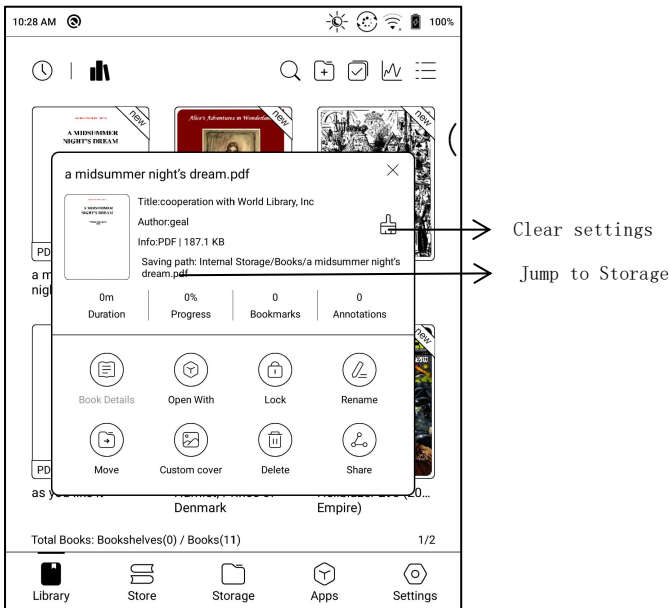

Long-press on sub-library cover to view more information about sub-library. To delete or rename sub-library are allowed. When deleting sub-library, the containing books will be moved to Library and will not be deleted with the sub-library.

## E-book Attribute

Long-press on book cover to view more information about E-book name, author, format, size, reading progress, book detail(only available for the E-books of Store), open way, Lock、rename, move(to sub-library) and delete. One E-book only can be added to one Sub-library.

As for the books purchased from the Store, is allowed to view book details by jumping to the Store page.

## Lock ( Reading Password)

User can add (reading) Password to lock each file in order to protect personal reading data;

The Password is used to open the file, but it only applies to the same device and NeoReader. If you copy and export the file to other devices or Apps, the Password will become invalid.

You can use the same Password as the Screen Lock. Or you can set a different digits Password.

Digits Password only support one Password. After you have set the digits Password, you do not need to set another digits Password and only need to add the Lock.

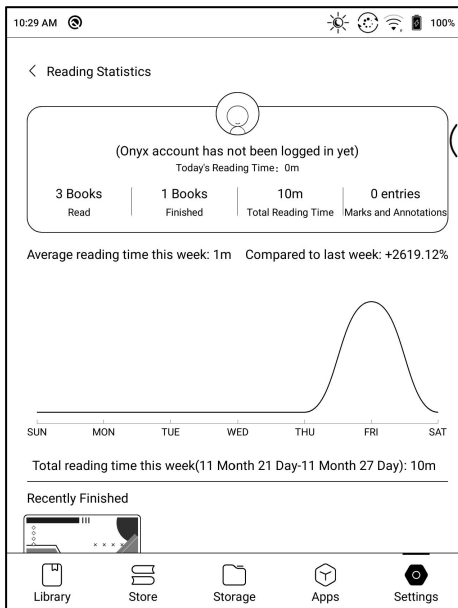

Reading Password supports individual setting or setting in bulk (setting in bulk is to add Locks). Currently It does not support to add Passwords to all files directly.

If you choose to use this Password Setting by default, you can add Password to other files quickly and do not need to re-select the Add Lock Option every time after the Password is set for the first time.

# Reading Statistics

This page includes the Reading Time of Today, The Books that Have Been read, The Books that Have Been Finished, Total Time, Highlights and Annotations, and Recently Finished Books;

The average reading time this week is based on 7 days and calculates the average daily reading time during the week;

Average Reading Time Distribution includes the reading time of all days since Reading Statistics is turned on.

Under Reading Statistics, only highlights and annotations can be jumped to and the books that recently have been finished can be opened. Other data is only for analysis purpose.

The reading data of each device can only be available on the same device.

You cannot check the statistics of this device on another device.

## Share (Third-party App)

This supports sharing files through third-party App. The sharing path is automatically obtained according to the installed Apps.

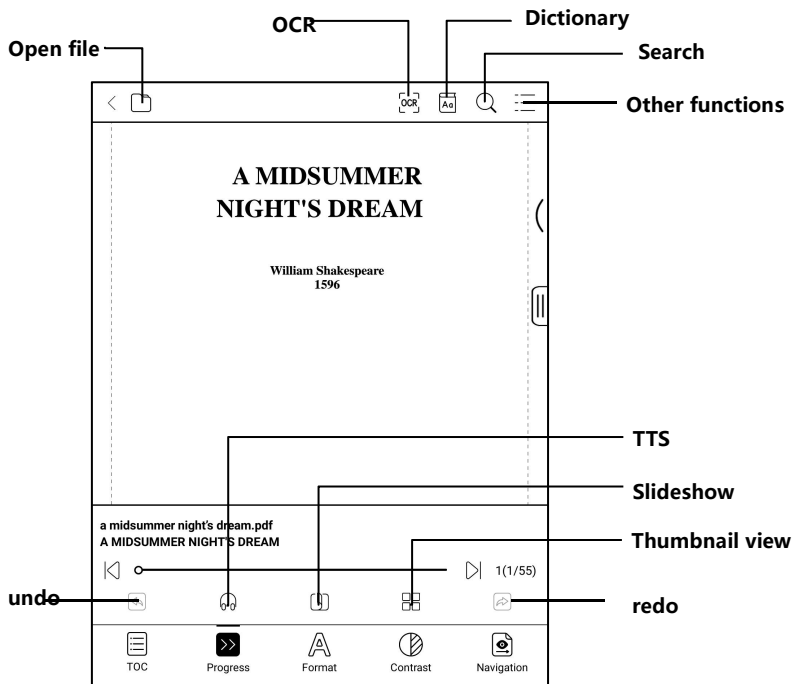

## 6. Reader

Tap any E-book cover to open an E-book. Full-screen reading without showing status bar is set by default.

To pull down from the top of the screen can call out the status bar.

To tap on the center of the screen can call out the menu bar for switch among different documents or other functions

## Floating Toolbar

You can choose to activate the Floating Toolbar for the first time when you open a file. Or you can go to Settings / Floating Toolbar Settings to enable it and customize the function buttons in the Floating Toolbar.

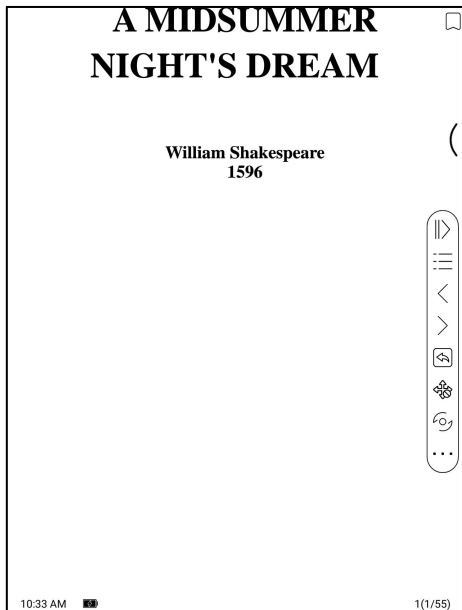

The Floating Toolbar includes: Hide, Menu, Prev Page, Next Page, Cancel (Progress)

Long press on the Floating Toolbar, you can drag it around on the screen.

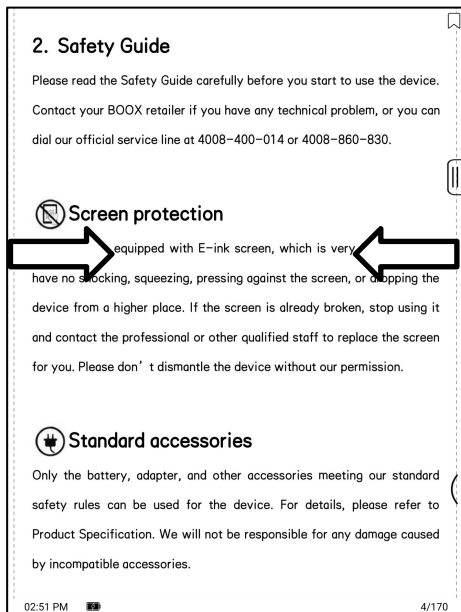

You can expand or contract the Toolbar to the edge to avoid cover any text on the screen. When you need it, just swipe from either side of edge to the other side to expand it.

When the page is zoomed in, the Floating Toolbar would automatically expand proportionally in order to manage the zoomed-in page better.

Under zooming status, single tap on the screen is set for turning sub-pages of each page (each original page will require several time page-turns to be completed). But tapping the virtual page-turn buttons on the Floating Toolbar is set for turning the whole original page.

You can disable the Floating Toolbar by going to Setting - General Setting. When it is contracted to the edge, you can swipe from either side of edge to the center of the screen to expand it.

## Word Menu

Long-press on the word to pop up dictionary dialog for look-ups.

English word recognition and look-ups are supported.

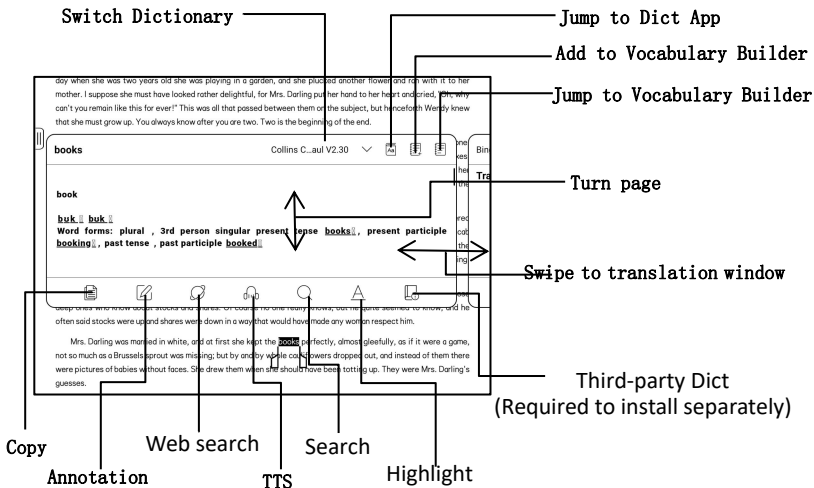

Through the drop-down list on the top right of the dialog, the dictionary can be switched to others.

Users can download and install the dictionary themselves. Put dictionary file on the path root directory\dicts\xxx (e. g

Storage\dicts\English-French), or download dictionary online directly.

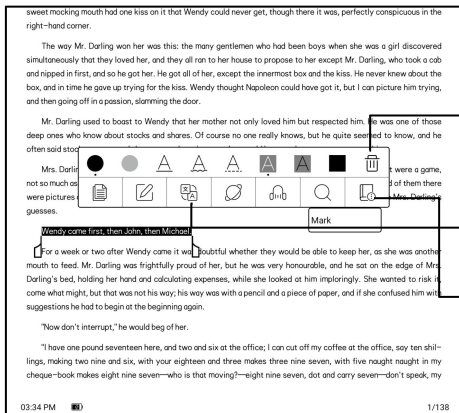

Dictionary is available to use after being installed.

Tap on any position out of the dialog to exit the dialog.

Long press on any word and drag to select the text you want to mark.

The highlight is set by default for selected text. Users can switch among highlight, underline and others, the color highlight can be in black or grey. The mark setting remains after a change. The marks before the change will not be affected.

Delete highlight

Switch translation

Third-party Dict

(Required to install separately)

Tap on any position out of the dialog to exit the dialog.

Choose “Annotation” to pop out a text box to add notes if needed.

# OCR (Beta Version)

Only supports pages in image formats PDF, CBR, CBZ, DJVU, and PNG.

Recognize one page only each time.

Choosing horizontal or vertical according to the document layout can improve the recognition accuracy.

Recognize 5 times a day when you are not logged in to your ONYX account.

Recognize 10 times a day when you are logged in to your ONYX account.

You can long-press text to add annotation and lookup dictionary on the

recognized pages

If some individual characters are not recognized correctly, you can switch to the original text in the annotation pop-up window to correct them, and manually modify the recognized text content (Do not change the original page text);

Pages recognized by OCR show the recognition mark in the upper right corner, and the recognized pages can be viewed in the Directory-Bookmark, which is convenient for quick locating and jumping;

Tapping the recognition icon again will clear the OCR content;

## Bottom Menu Bar (PDF format)

This bar includes settings of TOC, Progress, Layout, Contrast, Navigation.

## TOC

TOC contains Table of Content, Bookmark, Annotation.

TOC supports three-layer hierarchy. The current layer is underlined. Jump to the corresponding page when tapping any of the layers.

Tap on any position out of the TOC to exit.

## **Bookmarks**

Without calling out the menu, bookmark the reading page by simply tapping a tag on the top right corner of the screen. Tap it again to un-bookmark the page.

The bookmarks can be checked under the path of Doc-Bookmark, where users can delete bookmarks.

Jump to the corresponding page by tapping any of the bookmarks.

## **Annotation**

All highlighted/underlined/annotated content would be listed under the page of Doc-Notes for further searching, editing and deleting.

Jump to the corresponding page/content by tapping any of the lists.

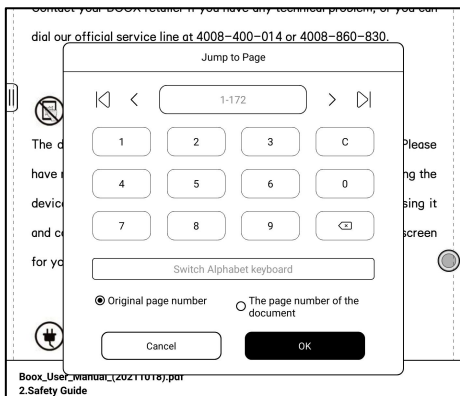

All contents on the Annotation page can be exported in txt format. Exported files are saved under the directory folder Storage\Note\<(same name as the source file).

## **Progress**

It displays the chapter name (book name if no chapter), page progress, last/next chapter, page number, slideshow, undo, and redo.

Tap on the page number to enter a quick-flip interface. Click the page numbers again and input number to jump to the page directly.

PDF files support for searching and using the files' own page number (custom page number type)

## Format

This includes settings of Paging, Zoom, Crop, and Margin.

**Zoom:**

Zoom in, zoom out, and partial zoom are supported. Users can also pinch fingers together or apart to zoom out or in on the reading pages.

When a single page exceeds the display area of the screen after zooming, you can long press and drag the display area around. Single tap is to turn sub-pages. You need to use the virtual page-turn buttons to turn the original whole page;

**Crop:**

Auto-crop according to the margin set by users.

**Margin:**

The default reserved blank area during automatic cropping. You can manually modify the automatic cropping area.

# Contrast

Embolden only applies to text in PDF.

Sharpen Imag can sharpen the images.

Watermark Whitening can whiten the light-colored images or background in the pages.

Dark Color Enhancement applies darker display to either the whole pages or text only.

## Navigation

Navigation allows users to have options of Reset, Comic Mode, Article Mode, and More Settings including Crop, Split, and Subpage Order.

**Comic Mode:** the screen will be divided into four subpages and the reading order is upper right - upper left - bottom right - bottom left.

**Article Mode:** the screen will be divided into four subpages and the reading order is upper left - bottom left - upper right - bottom right.

## More settings

Manually adjust the settings of area cropping, page split, and subpage order.

**Crop:** Manually select the cropping area for single or double pages.

**Split:** Split the pages into specified subpages in different ways.

**Order:** Decide the initial position and reading order for subpages.

## Reflow

Reflow now supports both scanned and text versions.

Reflow is only available for PDF/DJVU/CBR/CBZ documents.

### Scan Type

Reflow allows users to further customize the layout of documents including:

Line Spacing, Margin, Text Direction, Font Size, Columns, and Skew Correction (for italic documents).

	Scan Type		Text Type	
Text Direction	<input checked="" type="radio"/> 	<input type="radio"/> 	<input type="radio"/> 	<input type="radio"/> 
Spacing	<input checked="" type="radio"/> 	<input type="radio"/> 	<input type="radio"/> 	
Alignment style	<input type="radio"/> 	<input checked="" type="radio"/> 	<input type="radio"/> 	
Font size	<input checked="" type="radio"/> 0.75	<input type="radio"/> 1.0	<input type="radio"/> 1.2	<input type="radio"/> 1.5
Columns	<input type="radio"/> 	<input checked="" type="radio"/> 	<input type="radio"/> 	
Tilting Correction	<input checked="" type="radio"/> 0	<input type="radio"/> 5	<input type="radio"/> 10	
<input type="button" value="Reset"/>		<input type="button" value="OK"/>		

## Text Type

Applicable to the digital PDFs or PDFs that have been recognized by OCR (you can press and hold to look up words) PDF. The reflowed files can use the features of flow documents.

## Bottom Menu (other formats)

This includes settings of TOC, Progress, Format, Contrast, and Split View and supports flow formats such as EPUB\TXT\MOBI\AZW3.

## V2 Engine

Some flow formats (ePub\mobi\azw3\txt\word\jeb\html) use V2 engine by default. Go to Reading Settings/Other Settings to switch to NeoReader V2 engine supports the original layout of the document, including font, line spacing, margin, graphic typesetting, indentation, etc. ;

After being switched the V2 engine, the document will be closed automatically, and the V2 engine will be used when you reopen the files; If you need to switch back to NeoReader, you can cancel the V2 engine and reopen the document;

V2 engine does not support to sync data from NeoReader such as Bookmarks, Annotations, and Handwritten notes.

## Progress

The document needs to be paginated again after switched to V2 engine, or font and spacing adjustment. You can check the pagination progress in the reading Menu>Progress. After the progress bar is loaded, it means the pagination is completed. You can drag the progress bar to jump pages after the pagination is completed.

## Format

The settings include Font Face, Display and Spacing.

Loading font face in the directory Storage\fronts is supported.

The settings for font size, font face, contrast, bold, spacing work on all newly opened documents, but not work on the documents before settings.

## Screenshot

Diagonally tap on two corners of the screen to capture the screen in PNG format. The function is only available on the reading page.

The screenshot will be saved to the local, or shared by scanning QR code.

The save path is Storage\Screenshots.

## Refresh

Tap the hamburger menu located at the upper right corner to choose Refresh and other related settings of refresh

Regal refresh and partial refresh are by default

When scrolling the page, speed mode is by default.

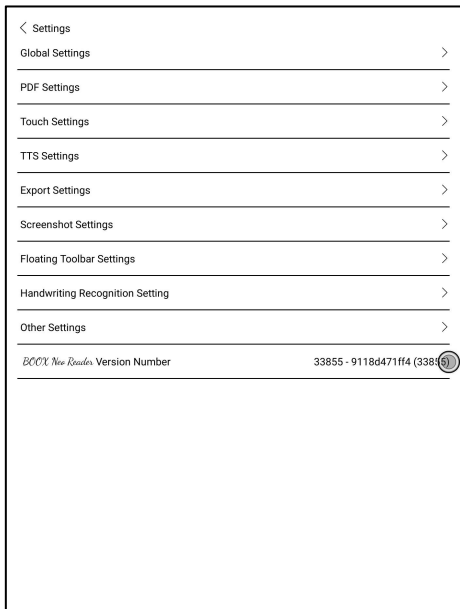

The screenshot displays a mobile application interface for "Alice's Adventures In Wonderland". The title is prominently displayed at the top. Below the title is a large, detailed illustration of a scene from the story. On the right side of the screen, there is a vertical navigation menu with icons for back, forward, search, and a hamburger menu. The hamburger menu is open, showing a list of settings. The settings are as follows:

- Page Refresh:** A row of three buttons: "Normal Mode", "Regal Mode" (selected), and "Speed Mode".
- Refresh Rate:** A row of buttons: "1", "3", "5", "10", "30", "50", and a "No Refresh" icon (a circle with a diagonal line).
- Full-Refresh:** A row of two buttons: "Normal" (selected) and "Deep".
- Drag to Refresh:** A row of three buttons: "Refresh after 3 seconds" (selected), "Speed Mode", and "Do not Refresh".

## Settings

There are General Settings, Touch Settings, TTS Settings, Export Settings, Screenshot Settings, Floating Toolbar Settings、 Other Settings and Version Name.

## General Settings

There are Enable page close reminder, Enable system status bar, Enable reader status bar, Enable multiple documents, Show file borderline, Enable Floating Toolbar, Show hyperlink, Show bookmark position, Apply certain options to all documents, Annotation Font Size Setting; .

< Global Settings

## Touch Settings

Users are able to customize the touch settings for different areas. There are six default touch modes can be chosen and users can customize three more.

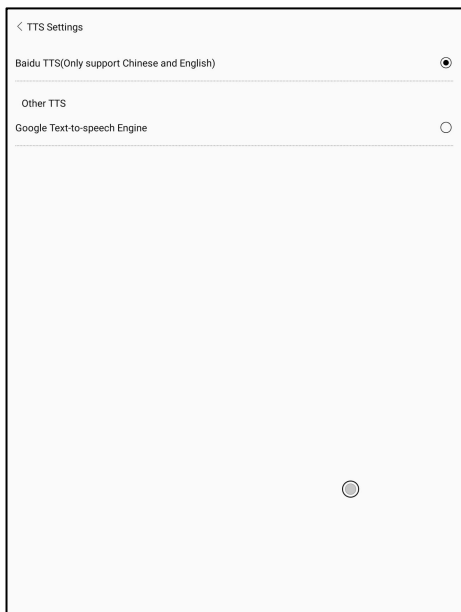

## TTS Settings

The built-in Baidu TTS is set by default. English is supported. A network connection is required at first use.

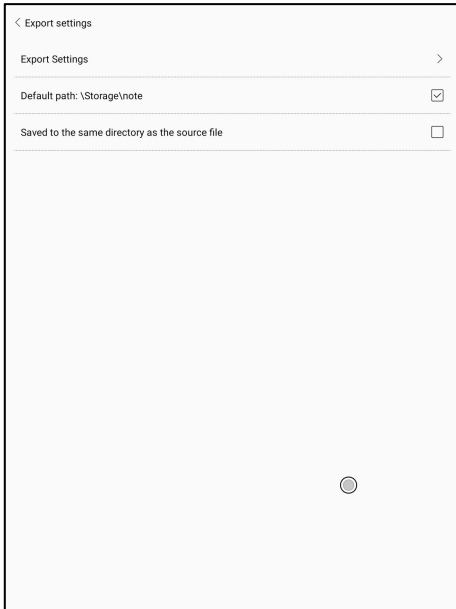

Switching to third-party TTS system is allowed. The built-in TTS settings are not synchronized with the system TTS settings. The system TTS settings work on the third-party TTS by default.

## Export Settings

The default storage path is Storage\Note.

The export files can be also saved to the same directory as the source file.

# Floating Toolbar Settings

This page offers General Settings of Floating Toolbar Settings;

## General Settings

It is enabled by default and can be turned off manually. After disabled, it can no longer be called out;

It can be customized whether the indicator is displayed after it is collapsed. Call out the Floating Toolbar by swiping from the screen edges.

The Toolbar's size, display style and functions buttons are customizable.

Custom function buttons support up to 11 in horizontal style and up to 14 in vertical style;

Press and hold the function button icon to display the definition of the function button;

## Other Settings

This setting page includes “Open ePUB documents with V2 engine” , Enable “Pinch-to-Zoom” , and Enable “Turn pages by swipes”

When “Turn pages by swipes” is disabled, you can only turn pages by tapping on the screen. This can avoid accidental page-turnings when you are taking handwritten notes.

◀ Other Setting	
Open Epub Document with V2 Engine	<input checked="" type="checkbox"/>
Custom layout is applied to all Epub documents(The beta version is temporarily not compatible with old data)	
Enable Pinch-to-Zoom	<input type="checkbox"/>
Enable Turn pages by swipes	<input checked="" type="checkbox"/>

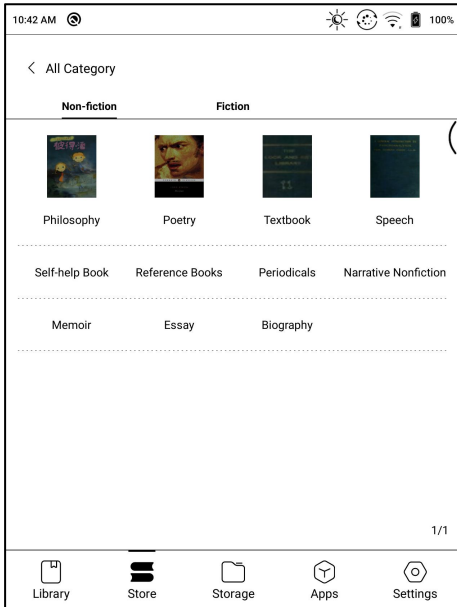

## 7. Store

In the language of non-Chinese, the Store is offering free publications E-books from the Internet.

# Category

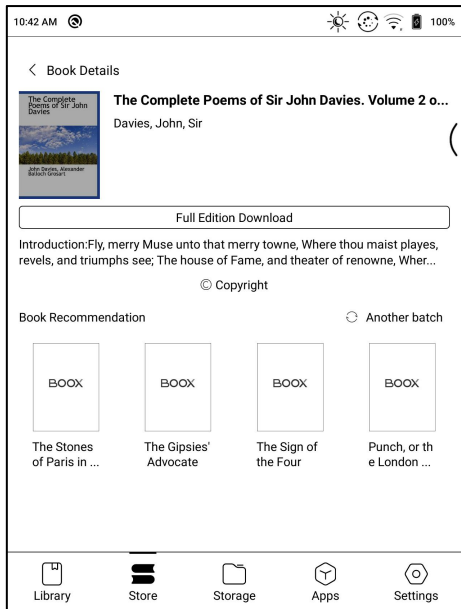

Books can be screened according to different categories.

## Book Detail

Click a book cover to open up book detail. The specific book information.

Click “Full Edition Download” to download the book, then you can see this book cover in Library .

# 8. Storage

## Recent Files

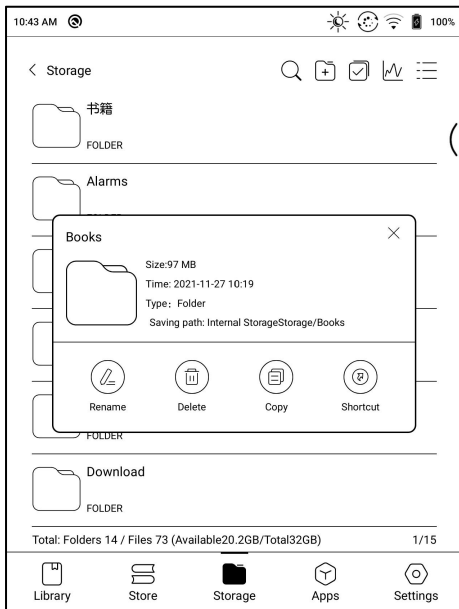

This section includes Shortcuts and Recently Updated Files, which are sorted in reverse order by time.

## All Storage

This section includes Storage path and Categories. files will be classified according to the file formats, but the original storage location of the file will not be changed;

Long-press the folder to pop up Property Window and choose “Set as Shortcut”, which offers quick access to open it.

## OTG External Disk

OTG is supported. Users can connect the device with USB drive through a Type-C cable. The device will detect USB drive afterwards.

The OTG feature would consume more power since it supplies power to a USB drive.

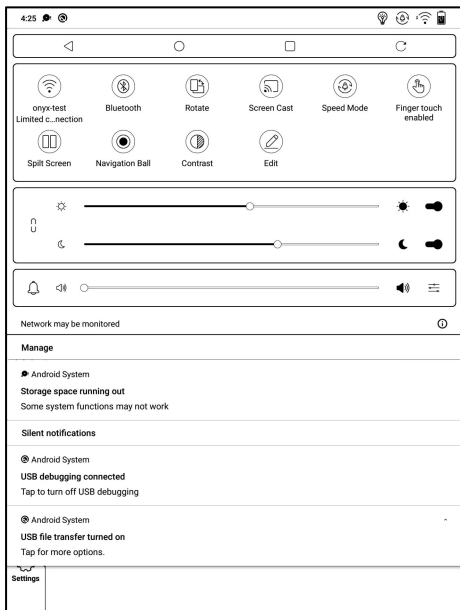

It supports analog and digital Type-C earphones ( You can use 3.5mm audio jack converter);

## Low storage space warning

Please reserve at least 300M of available storage space to ensure the normal operation of the system and saving related data;

When it is lower than 300M, a warning icon will be displayed in the system bar, indicating that the storage space is insufficient;

## 9. Apps

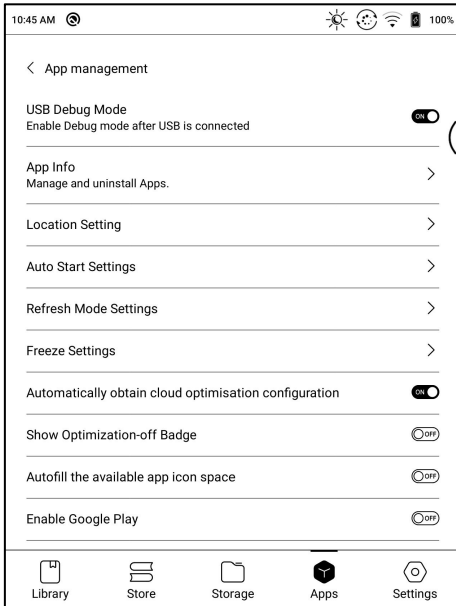

All installed apps are sorted by name by default. You can also sort them by time and manually.

Long press an app to pop up options of Uninstall, Manage, Optimize, and Add to a group

## App Management

This page includes USB Debugging Mode, Application Info, Location Settings, Auto-start Settings, Refresh Mode Settings, Freeze Settings, Automatically update the Optimization config of third-party apps, Fill in available space automatically, Enable Google Play.

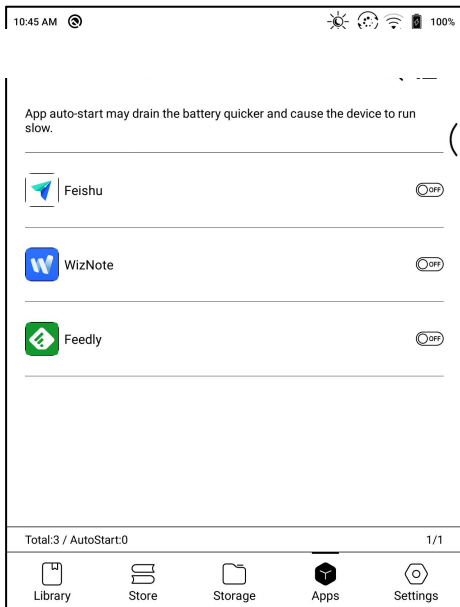

## Auto-start Settings

Only applicable to device auto-start. After it is enabled, the applications may take up more storage space and consumes more power.

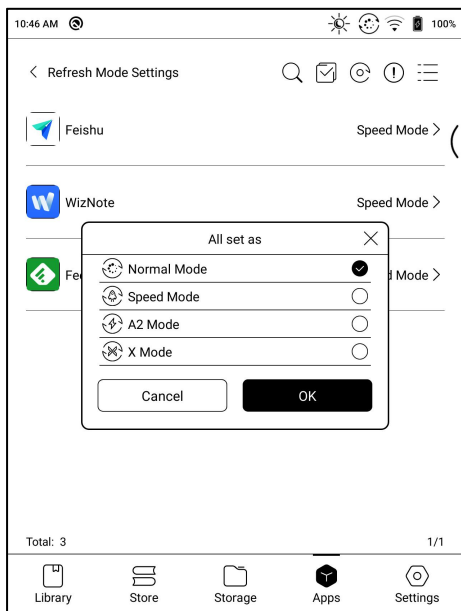

Apps need to monitor the system start. After apks are installed, you need to tap the app icon to start it once.

After it starts successfully, it only runs in the background and will not show in recent running tasks.

## Refresh Mode Settings

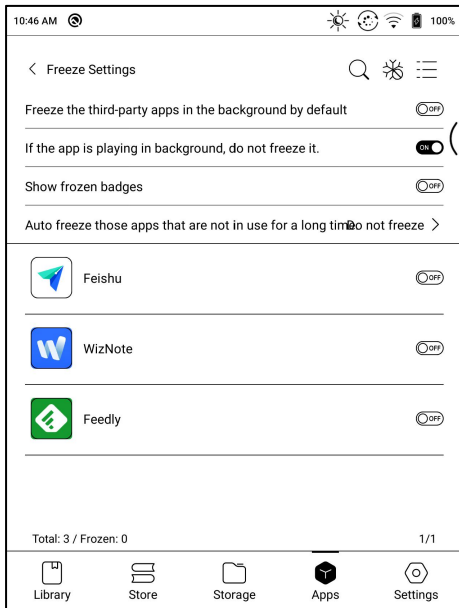

This allows you to set the refresh modes of third-party apps in bulk.

## Freeze Settings

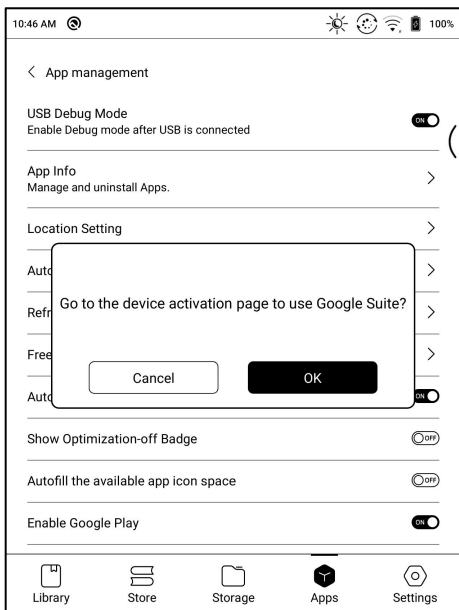

You can obtain the optimization settings of third-party apps with one click and freeze all apps in the background with one click for a better user experience and saving power.

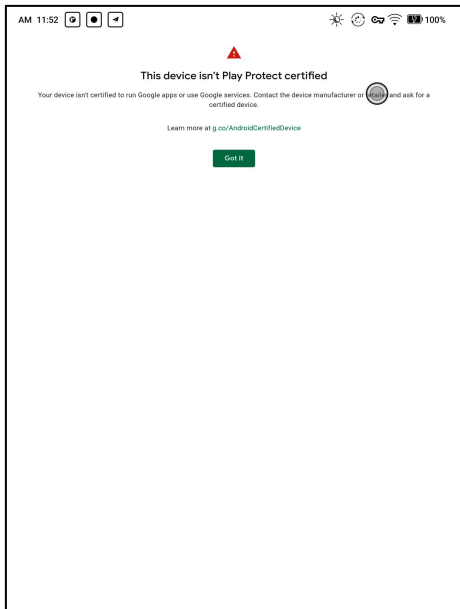

## Enable Google Play

If you want to use Google Play, you need to enable Google suite by the following steps:

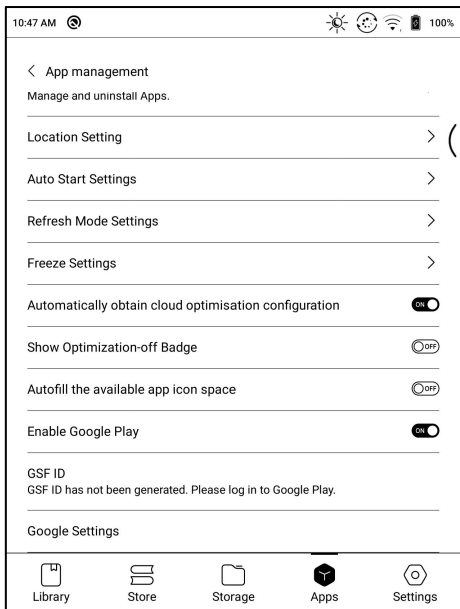

1. Connect to internet. Go to Apps, drop down the menu on upper right corner, select Application Management > Enable Google Play

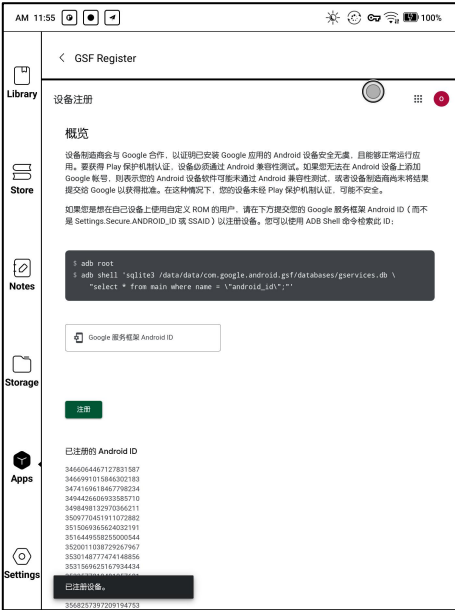

1. Tap “OK” when asked “Do you want to go to the activation page to enable Google Play?”. Then log in your Google account. A note will pop up saying “This device is not verified by Google” .

2. Go back to App Management page and tap GSF ID. You will go to GSF ID application page. Tick Human-machine Authentication and tap “Sign up”.  
(Google frame ID is automatically obtained and you do not need to enter.)

3. When you sign up successfully, there will be a note saying “The device has been registered”

4. When the device is connected to internet, Google Play will automatically download the latest version.

Please wait for 10-15 minutes for the Google server to return the verification result

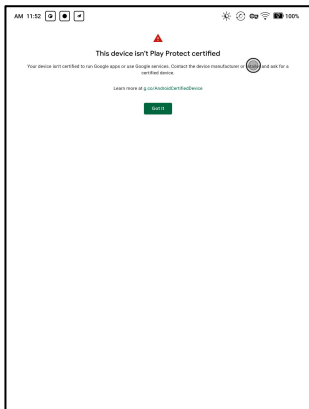

(Due to different regions and network conditions, the actual length of time to pass the certification may vary)

5. Without restarting, open the Application Management > Google settings > log in to the Google account.

6. If it jumps to the login page here, it means it has been passed. You can restart the device after logging in to the account.

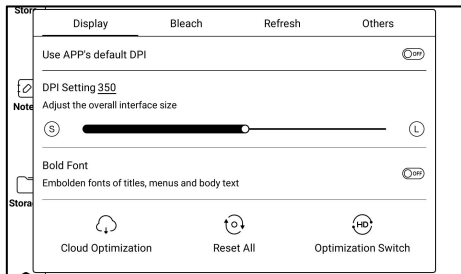

B. If it does not jump the protection mechanism page, it means it still hasn' t passed. Please wait for a bit long and try again.

7. If you wait for too long and it still shows that the device is not verified by Google, it means the verification has not passed. Please start again from step 3.

## App Optimization

### Display

DPI: Adjust the interface size of the app. The default value is 350,

If some content of the app interface has been cropped, you can reduce the DPI value.

If the overall interface size of the app is too small, you can increase the DPI value.

If you've adjusted the DPI value to the minimum, some content of some app interfaces such as Kobo is still cropped, you can choose to use the app's default DPI.

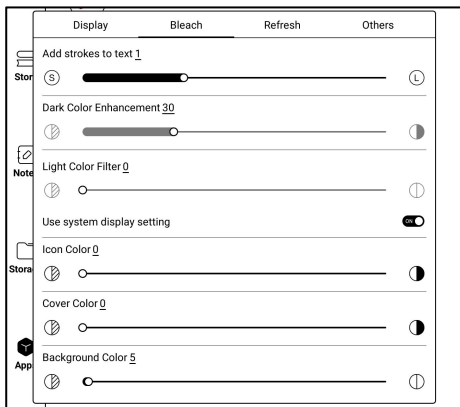

**Bold Font:** Embolden fonts of titles, menus and body text.

**Cloud Optimization:** Some apps are specifically optimized and you can retrieve the cloud optimization configuration to obtain better results than local optimization;

**Reset All:** Reset all modified configurations to the original configurations.

**Optimization Switch:** when it is turned off, some optimization effects will be canceled, but it won' t reset the configurations.

# Bleach

Add strokes to text: The text and background on the same layer will not be visible after being bleached together. This setting will add strokes to text and make the text visible.

Icon Color: this darkens the colors of small color icons in the Menu.

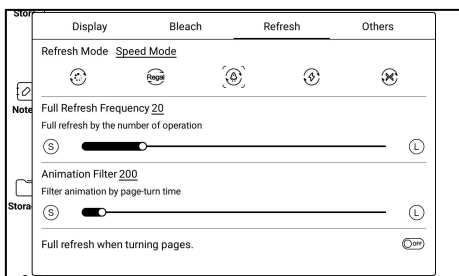

Cover Color: This darkens the colors of big cover icons.

Background Color: This bleaches the background colors.

It is recommended to use it along with Font Color Enhancement and Icon Color. Otherwise, the text and small icons on the background may be hardly seen.

## Refresh

Refresh Mode: This sets the refresh mode for individual apps. Normally the default refresh mode is Speed Mode.

Only when system's refresh mode is Normal Mode, the app's refresh mode will take effect.

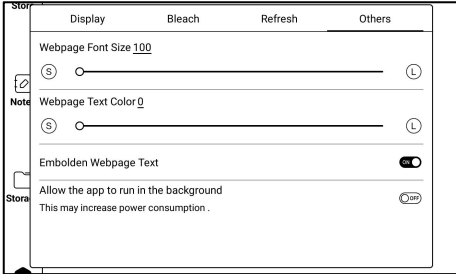

When system's refresh mode is set to Speed Mode, the system mode has priority. And the app's refresh mode will not take effect.

Full Refresh Frequency: In app, fully refresh the screen by the number of tapping in order to reduce ghosting.

The actual number of taps is related to the app's configuration. Sometimes a single tap may have several consecutive responses. E.g, you've set 20 times, but full refresh may be initiated after 15 taps.

Animation Filter: Filter the animation of turning pages in the app. Time indicates the duration of the animation effect to be filtered. Generally, the page animation is about 200 ms;

# Others

Full refresh when turning pages. : When the main function bar in the app is switched, full refresh is performed to reduce ghosting;

Switching some app function bar does not actually switch the pages, so full refresh would not be performed.

Webpage Font Size: Adjust the font size of the web view embedded in the app. When adjusting DPI does not work, try to adjust the font size of the webpage;

Webpage Text Color: When the adjustment of the bleaching does not work, you can try to adjust the color of the webpage;

Embolden Webpage Text: When Bold Font under Display tab does not work, try to embolden the text on the webpage;

Allow the app to run in the background:

For apps that need to run continuously in the background, such as Alarms, Notifications, Downloads, Time statistics and other apps, you can allow them to run in the background. But the continuous running in the background may increase power consumption!

## Navigation Ball

Navigation Ball is a circular ball that floats above all the apps on the screen. 9 buttons can be customized.

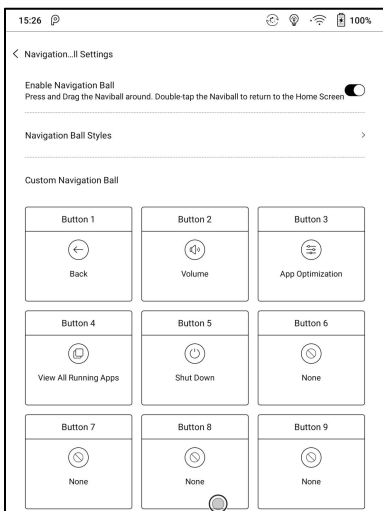

Single click on the ball to expand and collapse navigation menu.

It requires to turn off and on again after the new button settings.

The Navigation Ball by fault is in Fan-shaped style. You can choose other display styles (Horizontal Style, Vertical Style) from Navigation Setting.

You can also adjust the transparency of the Navigation Ball.

This supports to set as a resident button. After being set as a resident button, the button will always be floating on the top layer;

The 9 buttons can be set as multiple common functions including system operation, app switching, app optimization and so on.

The app optimization can be called out in an app through the Navigation Ball, for real-time review after optimization.

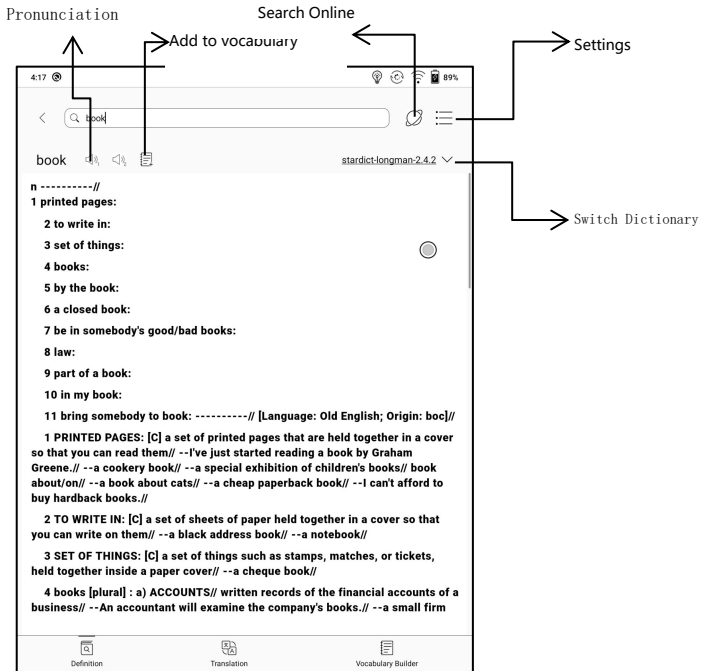

# Dictionary

If users use dictionary apps the first time, to download dictionary package to local will be asked.

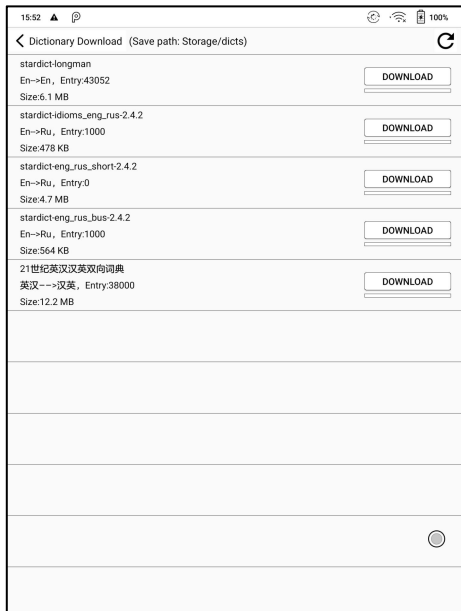

This function requires network connection.

Word pronunciation needs a dictionary file comes with voice files, currently TTS is not supported.

Users can install dictionaries themselves by putting the dictionary files to designated directory Storage\dicts\.

Please save the files under a folder, e.g., dicts\English-English Dictionary.

For the preferred dictionary settings, users can select up to 20 preferred dictionaries. Users will be asked to select again if the select number is less than 1 or more than 20.

After dictionaries are installed, users can look up new words in the search bar. Switch between different dictionaries by tapping a corresponding dictionary title on the bottom.

The search result is in terms of the related dictionary. If the word is unfound, try to use other dictionaries.

Looked-up words can be added to Vocabulary.

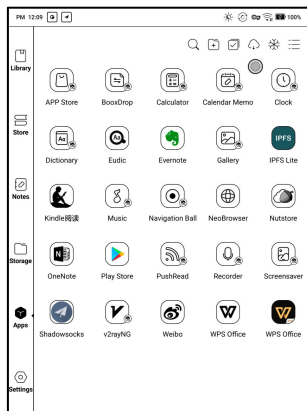

Users can divide the Vocabulary into groups. The words will be saved into the specified group once the group is selected.

# BOOXDrop

Connect your BOOX with PC or mobile phone. You can send files to your BOOX from PC or BOOX Assistant app, or save files on your BOOX to PC or mobile phone.

Instruction:

1. Open BooxDrop from Apps page or drop-down Control Panel

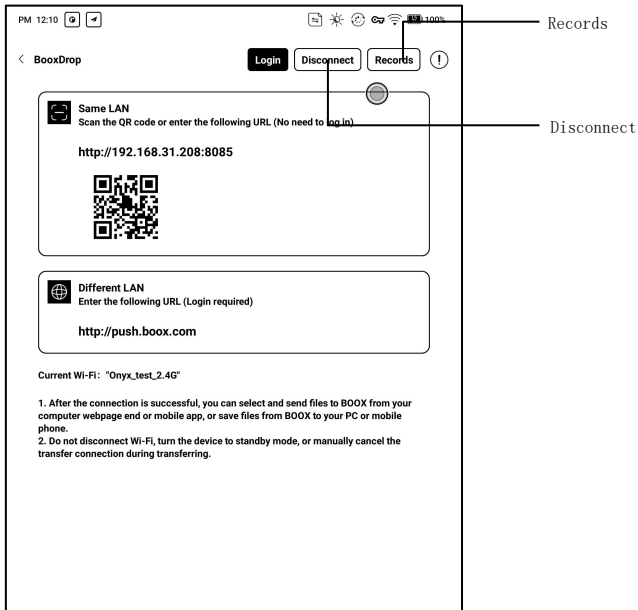

2. Open a browser on your PC

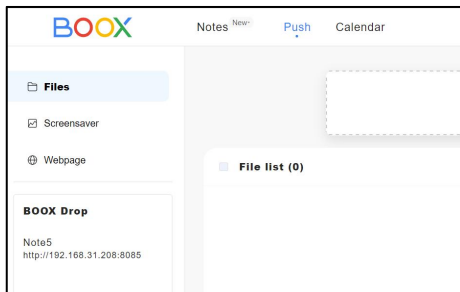

2.1 Without login: Make sure your BOOX and PC are in the same network.

Enter the IP address on your BOOX to the browser on your PC.

BooxDrop does not disconnect automatically. If you want to disconnect it, please do it manually or switch it off from Control Panel.

2.2 Logged in to ONYX Account: log in to push.boox.com. You can see the connected devices on Push page. Click it to open.

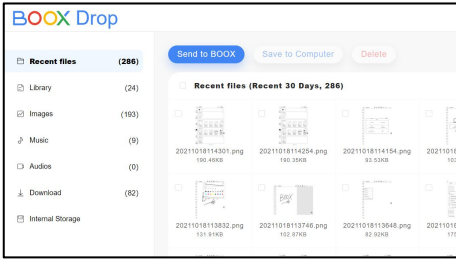

3. When you open the web browser on your PC, it will automatically confirm whether your PC and BOOX are in the same Wi-Fi network. If not, the page cannot be opened. Please connect to the same Wi-Fi.

4. When web end and your BOOX are connected successfully, you can load files and contents from your BOOX on your PC.

5. Send to BOOX: Select files from your PC and send to BOOX.

The sent files are automatically classified into the corresponding directory according to the format types.

Recent Files: include all files and are sorted by time

Library: Books/xxx.epub ( This includes all supported eBook formats in the Library )

Pictures: Pictures/xxx.png

Music: Music/xxxx.mp3

Videos: Movies/xxxx.mp4

Downloads: Download/xxx.xxx

Internal Storage: Transfer the selected directories.

6. Save to Computer: Select the files on BOOX and save them to computer.

Records

You can only check the transfer history on BOOX devices.

## PushRead

From the Subscription section of [push.boox.com](https://push.boox.com) or BOOX Assistant, you can enter a webpage address, push it to your BOOX, and read the page in html format.

To use the PushRead for the first time, you need to bind the same ONYX account on the website [push.boox.com](https://push.boox.com) and your BOOX;

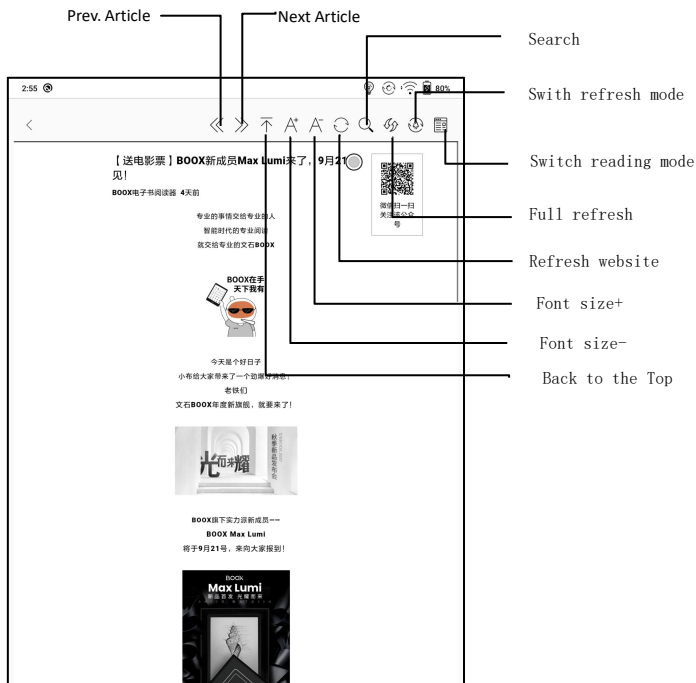

You need to connect your BOOX with Wi-Fi to download the pushed URLs for the first time. After loading once, it can be read offline later;

The layout of the content page defaults to Browsing Mode (the layout of the original web page), and you can choose to switch between Browsing Mode and Reading Mode from the More Menu;

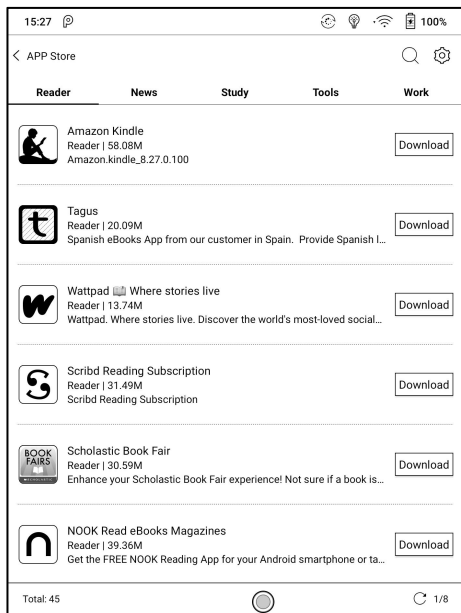

The Reading Mode is a single page mode, tap the page to turn the page directly;

## App Store (E-ink)

There are some usual third-party apps provided here. These apps are free versions from developers and their compatibility are not verified as full to the system. Paid apps download is not supported for now.

Users can choose to delete the installation package automatically after Apps are installed.

## **Screensaver**

The screensaver and shutdown image can be customizable. The shutdown image only supports image formats.

### **Screensaver style**

The Image Screensaver is by default.

The screensaver supports Image Screensaver, Poem Screensaver, Words Screensaver, Calendar Screensaver, Clock Screensaver, and Transparent Screensaver.

The clock, text, and Bottom Status Bar can be added to the other screensavers aside from the Transparent Screensaver.

Clock refresh intervals are customizable. After the clock is added to a screensaver, a certain frequency of refreshing screen will be retained in the standby state, and the automatic shutdown timing cannot be supported.

In Image Screensaver, when a single picture is selected, the screensaver is a fixed picture. When multiple pictures are selected, the screensaver will be shown in carousel format;

The Bottom Status Bar can display the battery status and lock screen status;

## Calendar Memo

The calendar Memo can display the notes and reading records under the current date. You can open the notes or documents directly by tapping the records;

You can add handwritten notes as a memo, which can be set as a screensaver.

Please go to Screensaver / Calendar Screensaver Setting for more details.

The content of Calendar Memo temporarily does not support the synchronization.

The screenshot displays the Calendar Memo application interface. At the top, there is a navigation bar with a back arrow, the current date range '< 2021-3 >', and icons for mail, calendar, and a menu. Below this is a calendar grid for the month of March 2021. The days of the week are listed as columns: Sun, Mon, Tue, Wed, Thu, Fri, Sat. The dates are listed as rows. The date '5' (Friday) is highlighted in black. Below the calendar grid, there are two panels. The left panel is titled 'Today's Notes' and 'Today's Reading'. It shows a note titled 'Notepad1' with the timestamp 'Mar 5, 2021 3:55:58 PM'. The right panel is titled 'Memo' and contains a handwritten note that says 'BOOK'.

After logging in to the ONYX account, you can use the mail function to

send the contents of the Memo to the designated mailbox as a PDF attachment;

The screenshot shows a mobile calendar interface for the year 2021, month 3. The calendar grid displays days from Sunday to Saturday. Friday, March 5th is highlighted in black. A dialog box titled "Send E-mail to" is overlaid on the calendar, containing a text input field with the placeholder "Please enter E-mail address", a checkbox labeled "Set as the default mailbox", and a warning icon with the text "File size cannot exceed 15M". The dialog has "CANCEL" and "OK" buttons at the bottom.

## About Device

It contains model name, Android version, MAC address and firmware version.

Click the model number for more information, including Capacitive Touch Version, VCom, Other information, Factory Reset, etc.

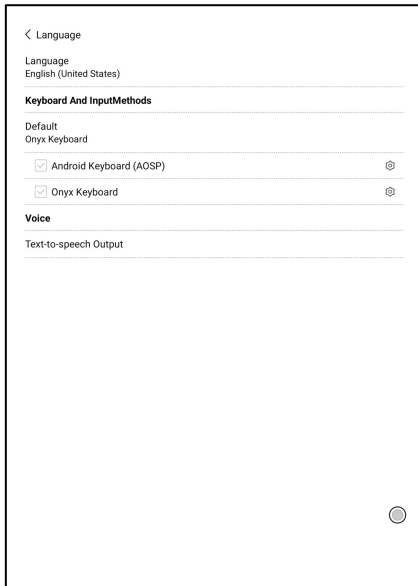

**Note:** To run the function of factory reset would remove all of the user data. Please make a data backup first.

## Languages & Input

Users can set system language, keyboard and input method and TTS on this page;

Users can set languages of the system and virtue keyboard. The system has an Android keyboard by default. Users can install third-party Apps for more input methods.

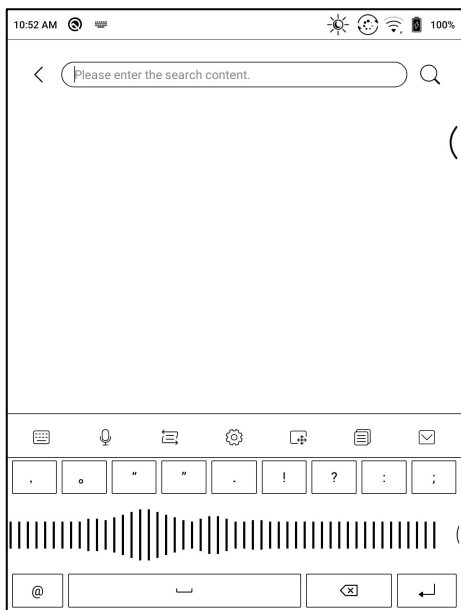

## ONYX Keyboard

Typing and voice input are available for ONYX keyboard, and network connection is necessary for first time.

### Voice Input

Long press the Space button on the ONYX keyboard to enable the voice input first. Only English, Mandarin, Cantonese, and Sichuanese are supported.

## **Date & Time**

Users can choose either auto setting or manual setting for date and time.

When the device is connected with internet, it will automatically set date and time according to local time zone. Manual setting requires to set time zone, date and time, and users can select their preferred time and date display format;

## **Power**

Users can set screen auto sleep timeout, Power off timeout, Delay disconnection when the device goes to sleep mode, Battery usage, Battery percentage, Auto-sleep when closing the cover, etc.

## **Network**

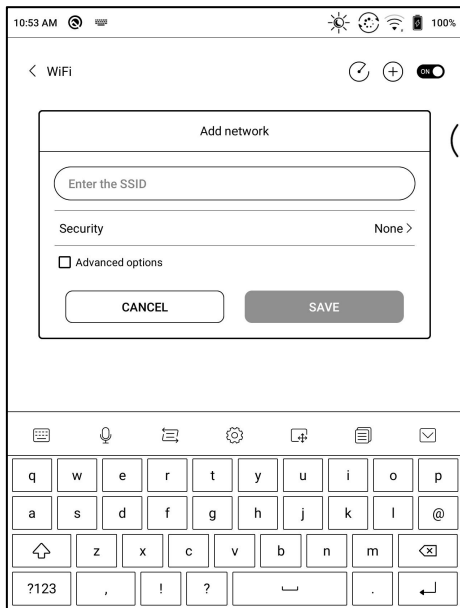

This is for Wi-Fi \VPN\Bluetooth setting. When Wi-Fi is connected, users can browse webs and download books via the internet on the device.

## Wi-Fi Settings

Slide Wi-Fi On, then available networks will be listed. Users can choose a network, then input password to connect with internet.

After Wi-Fi is connected successfully at the first time, the device will save Wi-Fi information automatically. Users only need to turn on Wi-Fi on notification bar if using the same WIFI next time.

Click the “+” button at the top right of the Wi-Fi page, users could manually connect to other network which is not listed, such as 802.1xEAP.

## Bluetooth Settings

Turn on Bluetooth, you can search for nearby Bluetooth devices and then send connection requests.

Bluetooth needs to be paired before use. Currently only support the eReader to receive documents, send documents from Boox eReader to other devices is not supported.

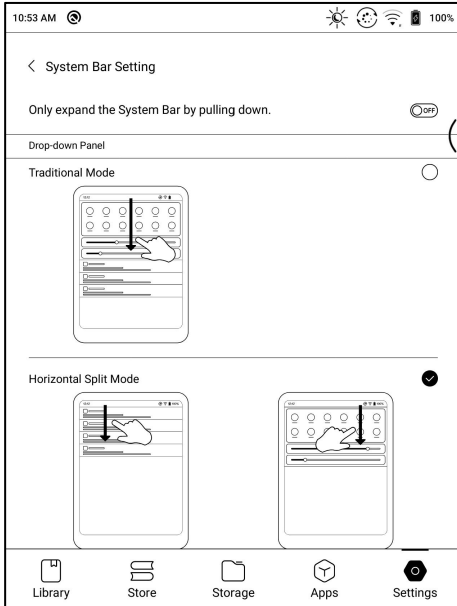

## VPN Setting

- When the VPN is turned on for the first time, the system requires to set a password. This password needs to be used only for screen unlock or when the factory settings are restored.

# System Bar

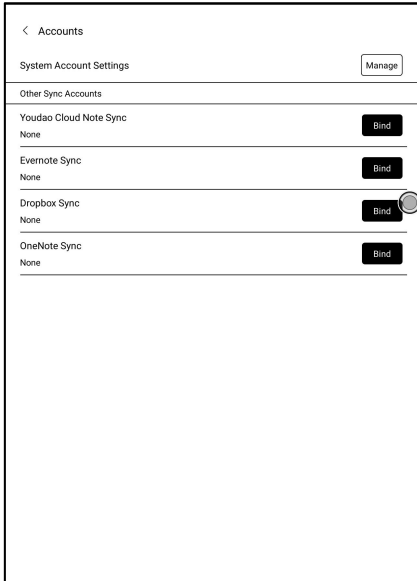

You can customize the pull-down menu. Pull-down menu from left and right sides are different.. The left pull-down is the Notification Center, and the right pull-down is the Control Panel;

## Other accounts

You can manage other accounts including Google, DropBox, OneNote, etc.

These accounts are only used for syncing notes.

## Password

You can set 4-16 digital screen-lock password.

The Android 11 models do not support resetting the password, please keep the password properly by yourself.

10:54 AM

Please enter a 4-6 digit numeric password

Confirm password

You can not reset your password without logging in your ONYX account.

## System Display

### System Font size

Support to adjust the system font size, the default is the standard font size, you can set a total of 4 sizes: small, standard, large, extra-large;

## **Custom Homepage**

The default Homepage is Library. You can set any of the other Function pages as the Homepage. You can return to the Homepage by tapping the homepage icon from the dropdown notification center.

## **System full screen refresh frequency**

The system performs one full refresh every 5 operations

The Library and Notes will be automatically refreshed once more due to the loading list, and the actual number of operations will be one less than the set number;

## **Function Area display icons only**

The text under the Function icon can be hidden.

## **Enable Book Store**

The built-in book store can be turned off, but cannot be uninstalled or removed.

## \*Gesture Manager(Only Poke4Plus Support)

You can customize 3 gestures for the bottom and 2 gestures for the sides.

The default functions for the Bottom include: Back, Back Home, Multitasking Switching...etc. Swipe up from the bottom to use them.

The default functions for the sides are Volume +/-, and Frontlight +/-.

Long press the sides to slide up and down to adjust.

Support modification to other functions;

## **Server**

The server is allocated according to the system language by default. The Chinese language system uses the Asia server, and the other language systems use US server;

After manually selecting the server, it will no longer be automatically matched according to the system language;

Please choose the server in your area. This will avoid the slow network connection which impacts the use of some specific functions (including bookstore, synchronization, application market, OTA detection and other functions that require networking);

## **Firmware Update**

Users can get the Model number, Android version, Build number and update check. Upgrade checks the local package first then online package with a network connection. Upgrade pause and breakpoint download are allowed.

Please ensure the device has more than 30% power and sufficient capacity before the update.

## **Update History**

Check Update History and the changelog of every update.

## **Feedback**

### **FAQ**

If having any problems, you can directly find the questions in the FAQ, quickly locate and solve the problems.

### **Submit Feedback**

Welcome to submit any technical problem or advice to us.

This function collects system information for problem judgment. And Onyx shall never disclose users' device information.

The related logs will be cleared after the device shuts down. If you need to send feedback after the device is off, please enable Save Logs to local in Feedback so that you can send related logs after restarting the device.
