Chapter 4 Troubleshooting

1 Kuaderno Trouble

The power does not turn on

Can not charge

Battery consumption feels faster

It takes a long time for the screen to appear

The screen does not appear
The touch panel's response is slow

2 Trouble with stylus pen

The stylus pen cannot be operated

The tip of the pen and the actually written position are shifted.

If you draw a line diagonally using a ruler, etc., will cause the line to wave.

When the core of the stylus pen is worn out.

3 Network troubles

Wi-Fi network settings/connections cannot be set.

Wi-Fi network connection suddenly became impossible.

Bluetooth connection suddenly became.

4 Document trouble

Unable to view the document.

The character is not displayed.
cannot be written. Cannot edit or delete writing. 5 Trouble with connection with pc. Cuaderno is not recognized on the computer. I can't transfer documents from my computer to Cuaderno. 6 Troubles when capturing from ScanSnap. I pressed the 'Scan' button on the main body of ScanSnap. You receive an error message saying "Wi-Fi on this unit is off". If the connection continues to be unopreeded in Cuadelno during the connection, the connection with ScanSnap will be lost. The ScanSnap you want to connect to does not appear in the "ScanSnap List that can be connected". 7 Care of Cuaderno. 第 5 章 仕様一覧

2. Security て
Lock your screen
For security reasons, you can lock the screen to Cuaderno. When the screen lock is applied, the
You will need to enter the lock password after you start or when you wake up from sleep mode.
To enable the screen lock function
1
Press (Home button) until you feel "click", then tap "Settings".
2 Tap "Body Settings"-"Screen Lock"→"Screen Lock"-"Enable"-"OK".」の順にタップします「
3 Enter the lock password and tap OK.
A lock password can contain 4 to 20 alphanumeric characters and symbols.
To disable the screen lock function
1
Press (home button) until there is a feeling of "click", "Settings"→"Body Settings"→"Screen >"→Screen Lock.
2 Enter the lock password, tap OK, select Disable, then tap OK.
POINT
Do not use lock passwords that are easy for third parties to guess. In addition, the lock password should be changed regularly.
い。
Don't forget the lock password you set. If you forget your lock password, you can initialize The Cuaderno (compensation) is required, and the data is erased when initialization is performed. If you wish to initialize (for a fee), please refer to the "Fujitsu Personal Products
Please contact us at the Contact Information Desk. We will keep it and initialize it.
When entering the lock password, the input with the Tab key and the [Space] key is not valid.
Unlock the screen with a FeliCa card or compatible device. 你可以
Instead of entering a lock password when returning from sleep mode, you can use the FeliCa card or FeliCa pair.
You can unlock the screen by holding your mobile phone, smartphone, etc. to Cuaderno.

Register FeliCa cards and FeliCa-enabled devices with Cuaderno 你可以
After you set your lock password, follow these steps to register your FeliCa card or FeliCa-enabled device with Cuaderno:
1 Press (Home button) until you feel "click", then tap "Settings".
2 Tap "Settings" > "Screen Lock" > "Settings of NFC card used to unlock".
3 Enter the lock password and tap OK.
4 Tap "Register NFC Card" and if you are prompted to turn on NFC, click Yes.
5 Tap.
6 FeliCaカードの中心またはFeliCa対応機器の(FeliCa mark), Cuaderno's の(N)マーク
for about two seconds.
7 To unlock the screen 你可以
1 When the lock password entry screen appears, the center of the FeliCa card or the FeliCa-enabled device (FeliCa mark), Cuaderno's の(N) mark) for about 2 seconds.

Delete information about registered FeliCa cards and FeliCa-enabled devices 你可以
1 Press (home button) until there is a feeling of "click", "Settings" → "Body Settings" → "Screen"
> "Settings for nfc cards to use to unlock".
2 Enter your lock password, tap OK, then tap Remove NFC Card.
3 Register another FeliCa card or FeliCa-enabled device 你可以
You can only register one of the FeliCa cards or FeliCa-enabled devices. 1 The currently registered FeliCa card or
After you delete the FeliCa-enabled device information, register another FeliCa card or FeliCa-enabled device.
Heavy to If the material such as the desk where this product is placed is metal, such as failure to communicate with FeliCa card or FeliCa compatible device, this product 作 may not be used. If it does not work properly, please use it about a few centimeters away from the metal such as a desk.

3. How to check the version 法
You can check the version as follows:
Check the console software version of 你可以 Cuadelno.
Use the following procedure to check the version of Cuadelno's console software (firmware).
1 Cuaderno's の
(home button) until there is a feeling of "click", "Settings" → "This device に"
> "Device Information".
2 Check the version of the Digital Paper PC App 你可以
■ Windows の場合
4. Smartphone 携

To transfer documents on your phone and in Cuaderno, click QUADERNO Mobile App on your phone. To install, go to the "Downloads" on the product information site on your smartphone and click QUADERNO Mobile App to install it.

Check with your smartphone 索

On your phone, open the Google Play or App Store, search for the app name or "Cuaderno" and search for search results or select "QUADERNO Mobile App" to install it.

QUADERNO Mobile App Help Guide

Click on the "MobileApp" menu to click "Help Guide" from the menu that appears.

You can view it when you see it.

POINT

The license is displayed the first time you start QUADERNO Mobile App. Read it carefully and click "I agree". だ

5. To restore Cuaderno's files,

Data stored in Cuaderno is backed up to your computer using the "Digital Paper PC App" and can be restored. Data stored in Cuaderno is backed up to your computer using the "Digital Paper PC App" and can be restored.

Back up frequently in case files stored in Cuaderno are corrupted or destroyed.

It is recommended that.

● For information on how to back up, see Backup (page 55)

● To return back data to Cuaderno, see Transfer documents from your computer (page 53)

If you want to.

Heavy to

Do not specify the folder that you want to use for backup as a sync folder in Cuaderno.

If you specify it as the Synchronization folder, the file is deleted because it updates to the state of the file in Cuaderno.

Please use the "Sync" folder and the "Backup" folder separately.
6. Take advantage of the schedule format

In order to make use of Cuaderno like a notebook, we have prepared a schedule format.

Get the schedule format

Please download it to your computer from "Download" of the product information site and use it.

Master the schedule format

Put it in the Schedule folder.

When the schedule format is placed in the "Schedule" folder in the dedicated app "Digital Paper PCApp", Adelno's home menu (→ P. 20) can be displayed immediately from the "skel".

How to put the downloaded schedule format in the "Schedule" folder in Cuaderno?

see Transfer documents from your computer (→ page 53.) をご覧ください

Add and remove pages

Same as working with notes. See Add/Remove Pages in Notes (→ page 40.) をご覧ください

   If the document has a , in the note appears on the left.
   If unread, the P: System.Web.M. is displayed.

(1) Tap here...
(2) "Recently Opened Documents"
26

3. Deletion and renality of documents

Delete a document

1 Tap one of the locations on the Document screen to display the toolbar.
2 In the upper right corner of the screen (optional)→Tap Delete Document.
3 When prompted, tap Yes.

Rename a document

1 Tap one of the locations on the Document screen to display the toolbar.
2 In the upper right corner of the screen (optional)> ”Rename document”, tap 「ドキュメン」.
3 When you have renamed the document, tap OK.

27

4. Read the documentation

Switch between pages in page position view

1 Tap one of the locations on the Document screen to display the toolbar.
2 Tap the appropriate place of the page position display displayed in the upper center.

Turn a page

Swipe the screen to see the next page. To return to the previous page, swipe in the opposite direction.

POINT

If ”Page Orientation Setting” is set to ”Left Opening”, right to left, if it is set to ”Right Opening”, I will. Pdf files that are not set on your computer can swipe from right to left when you purchase them to the next page. に

Go.

Tourba —

Page position table shown

28

The place of the left opening

☐ If you want to display the next page, 合
Swipe from right to left.
☐ If you want to display the previous page 合
Swipe from left to right.

Change the direction of page turning

1 Tap one of the locations on the Document screen to display the toolbar.
2 Tap (Optional) in the upper right corner of the document screen>Page Orientation Settings.
3 Swipe left to left to turn a page with left-to-left, or swipe left to right to turn the page. する
When you tap ”Right Open”.
View a list of pages and switch between pages

You can find a page by displaying a list of 16 pages on a single screen.

1 Tap one of the locations on the Document screen to display the toolbar.
2 Tap (Optional) in the upper right corner of the document screen > "Page List".

When the three-page list appears, tap the page you want to open.

POINT
When you view a list of pages from the left and right side documents, the list is 9 pages.
While viewing the document, you can pinch-in to view the page list.

Specify a page to display
Specifies and displays a page.
1 Tap one of the locations on the Document screen to display the toolbar.
2 Tap (Optional) in the upper right corner of the document screen > "Page Navigation".

Display the left and right pages in a two-page spread
Displays a document on two pages in a left-right spread.

1 Tap one of the locations on the Document screen to display the toolbar.
2 Tap (Optional) in the upper right corner of the document screen > "Spread View".

Change page settings
Depending on whether the cover page is available, you can change whether it is visible in a two-page spread.
1 (Optional)→Tap Page Setup for Two-Page.
If you select No Cover Page, from the first page, select With Cover page to display a two-page spread.

Back to page view
1 (Optional)→Tap Single Page View.

Heavy to
While viewing in a two-page spread, you can view two documents on the left and right, create side notes, or add or delete pages of notes in the future.
It is not possible to write across pages.

Tile documents on the left and right
Displays two side-by-side views of the same document. You can also view other documents or notes side by side on your computer.
Documents cannot be displayed vertically.

1 Tap one of the locations on the Document screen to display the toolbar.
2 In the upper right corner of the document screen (optional)→Tap "Tile documents".
3 Tap the side (Quick Access List) on which you want to view another document or note, and then click Tap the document you want to view.
The Quick Access list contains a recently opened document or in the same folder as the document you are viewing.
Displays some of the documents that you want to use. View documents that don't appear in the Quick Access List side by side in it does not.

POINT
If you want to switch the display of the Quick Access List, click "Recently Opened Documents" at the top of the Quick Access List.
Tap Documents in the same folder, then tap the other item.

Replace left and right documents
1 Tap Left or Right (Optional) → Swap Left and Right Screens.

31

Return to one of them す

1 Tap the document you want to view (optional) and click "Show this document only" in the same way.

Open the last document

After you return to one of the views, you can open the document/note you previously ordered.

1 (Optional) > Open last ordered document.

Zoom in on the screen

While viewing the document, you can zoom in on the screen by pinch-out.

POINT

If you want to exit zoom mode, click on the toolbar.

The magnification is displayed in the upper left corner of the screen. You can use it as a guide to what extent it will expand. You cannot turn a page while zooming in.

With zoomed in, you can swipe to scroll through the screen.

You can also switch to zoom mode from the toolbar.

1. Tap the screen to display the toolbar.

2. (Zoom in) to switch to zoom mode.

4. Tap the search criteria field, then type the text on the keyboard, then tap Search.

The search results are displayed.

5. Tap one of the search results.

The document opens.

Close the list of search results

1. Tap Back to Document List in the upper left corner of the screen.

Search by a specific handwriting mark.

In Cuaderno:

And

you can search for documents that have written a specific mark in the same way.

1. Press (Home button) until you feel "click", then tap "Document List".
2. Tap (Search) in the upper right corner of the document screen.
3. After tapping the Marks tab, 

And

Select the mark you want to search for one of the on your computer.

Displays the document that has been marked.
Even if there are multiple relevant parts of a document, the search results are displayed as a single document.

POINT
Depending on how you write your handwriting, it may not be recognized correctly.

4 Tap one of the search results.
The document opens.
□ Close the list of search results
1 Tap Back to Document List in the upper left corner of the screen.

6. Write in the document

Adjust the position of the pen tip
Sets the way the stylus pen is held and compensates for the deviation between the position where the tip of the pen is applied and the position written.

1 Press (Home button) until you feel "click", then tap "Settings".
2 Tap "Body Settings">"Adjust Pen Tip Position".
3 From the four stylus pens, choose the one that is closest to your holding, and then tap Next.
4 Use the stylus pen to trace the dotted line when you write it.
   When tracing, no line appears above the dotted line. When you release the tip of the pen, a line is displayed.
   Adjust the deviation of the line written here on the next screen. Don't worry about the deviation of the written lines.
   Even an eraser can't go away.
5 Tap Next.
   The manual correction screen is displayed.
6 Tap the up, down, left, and right arrow icons to move the lines you wrote and adjust them to match the dotted line.
7 When you are in about the same position, tap Next.
   A confirmation screen is displayed.
   Trace the dotted line again, as in step 4.
   If you feel that the lines you wrote are off, tap Readjust to return to the previous screen. Confirmation surface
   You'll see the lines you've written in, so adjust the position again, as in step 6. After the position adjustment is completed, the following
   to trace the dotted line on the confirmation screen again.
9 When the dotted line and the written line come to match, tap Save.

36
Write directly on a document

1 Use the stylus pen to write directly on the page.
   You can write with a firm palm on the screen, just as you would write with a pencil or ballpoint pen on paper.
Change the pen type

1 Tap one of the locations on the Document screen to display the toolbar.
2 Set the pen in the upper right corner of the document screen ( ) and click the "Pen Color" or "Pen Thickness" item.
   Select it.
POINT
On the Quaderno screen, the blue pen is black and the red pen is gray, but when you transfer it to your computer, it appears in blue or red.

When you write it, it saves what you write.

They highlight

1. Press the "highlight button" on the stylus pen to trace the text.
2. Heavy to
3. You cannot highlight in the following cases:
   Documents read by the scanner (the entire page is image data)
   Character embedded as an image
   Where I wrote by hand in Cuaderno
   Not included text
   Highlights are displayed in light blue on your computer.
   You can only highlight text data.
   Highlight Bota

---

Use an eraser

1. Touch the handwriting or highlight with the tip of the pen while holding down the eraser button on the stylus pen.
2. The handwriting and highlights you touch with the tip of the pen are removed.
3. Cuaderno erasers can erase the included data by selecting part of the line. Select multiple lines with them in mind and can be erased at once.

Change the size of the eraser

1. Tap one of the locations on the Document screen to display the toolbar.
2. Tap (Pen Settings) in the upper right corner of the document screen and select the "Eraser Size" item.
3. The place to erase it in Cuaderno
4. Where to erase what you wrote on paper

---

Copy, cut, and paste handwriting

1. Tap one of the locations on the document screen where you want to copy/cut
2. Displays the bar.
3. Tap (Optional) in the upper right corner of the document screen> Select Range.
4. Switch to the screen of the range selection mode.
5. You cannot turn the page on a screen in range selection mode.
6. Use a pen around the handwriting you want to copy/cut, and select Copy or Cut.
7. The handwriting within the enclosed range is selected.
8. Return to the document screen when you have finished copying or cutting.
10. It switches to the screen of the paste mode.
11. You cannot turn the page on the screen in paste mode.
5 Tap where you want to paste.
After pasting, you can adjust the position by dragging handwriting with a pen.
When you're done adjusting, tap Confirm, or tap a location other than the selected handwriting to see where to copy/move.
will be confirmed.

When you want to move a cut handwriting in the same screen
1 Drag the selected handwriting to the location you want to move, tap Confirm, or click on the outside location.
Heavy to
You can only paste once. paste once and
(Paste) is hidden.
The copy/cut content disappears when you restart Cuaderno.
A new copy/cut overwrites the previous selection.

Show write list
You can search for pages by viewing a list of handwritten or highlighted areas.
1 Tap one of the locations on the Document screen to display the toolbar.
2 Tap (Optional) in the upper right corner of the document screen."
POINT
Depending on how much writes are in the document, it may take some time to display the write list.
3 Tap the "Handwriting List" tab or the "Highlight List" tab.
4 Tap one of the items in the list.
Go to the page you tapped.
Close the write list
1 Tap a location other than the write list.

Restrict editing of writes
Prevents you from editing writing to a document other than your Cuaderno.
The setting at the time of purchase is enabled.
1 Press (Home button) until you feel "click", then tap "Settings".
2 Tap "Body Settings" - "Edit Writing Restrictions" - "Enable".

7. Use your notes
Notes are documents(PDF files) with special attributes. in a similar way to a document, open or inspect you can write, and work with your PC with the Digital Paper PCApp.
There is also a usage that can only be done with a notebook.

Create a new note
There are two types of notes: "independent notes" and "document side notes." Here is an independent
Describes how to create a . For information about how to create a side note, see Create a side note for an open document.

1 Press (Home button) until you feel "click", then tap "Create Note".
2 Select the template and tap OK.
Notes are created in theNote folder with a file name that combines the template name and creation date.
Heavy to
If you follow these steps while the document is open, it will not be a side note of the document.

Open notes
You can also open notes from a document list or a quick access list, just like a document.
Press (Home button) until you feel "click", then tap "No To List".

2 Tap the note you want to view.

Create side notes for an open document

There are two types of notes: "independent notes" and "document side notes." This topic describes the document.

Describes how to create side notes. For information about how to create a separate note, see "Create a new note" (see page 39). ご覧ください

POINT

Because side notes are a one-to-one relationship with a document, you can use the documents screen to (Optional) "Open Side Note" you can view side by side with the document. This is useful because you can view notes without having to look for them in the list.

1 Tap one of the locations on the Document screen to display the toolbar.

2 In the upper right corner of the document screen (optional)→Tap "Create a side note for this document" and tap on your computer.

3 Select the template and tap OK.

Documents and side notes are displayed side by side. The sidenot is the file name of the document with the file name followed by _Note, and the same as the document. じ created in a folder.

Replace documents and side notes

1 (Optional)→"Swap left and right screens" and then tap.

View only one of the documents

1 Tap one of the left or right (optional), then tap Show this document only.

40

Heavy to

Documents and side notes cannot be displayed vertically.

(Home button) until there is a feeling of "click", when you tap the "Create Note" in the side note

independent notes.

You cannot create side notes in a note.

POINT

Only one side note can be created in a 1 document. If you want to create a side note that is different from the existing one, side-by-side with the existing side notes (Optional)→Create a side note for this document.  の

Tap in the order. The old side note will be a separate note.

Open side notes

A side note is a document(PDF file) with special attributes. Like documents and independent notes, You can also open it by itself.

1 Tap one of the locations on the Document screen to display the toolbar.

2 Tap (Optional) in the upper right corner of the document screen>OpenSide notes.

Add or remove pages from your notes

Heavy to

Once you delete a page, you cannot undo it.

You cannot add or remove pages while viewing a two-page spread.

1 Tap one of the locations on the Document screen to display the toolbar.

2 In the upper right corner of the document screen (optional)→"Insert new page" or "Delete current page" の

Tap, and then tap.

Tap Insert New Page to add one page before the currently displayed page.

Add a page to the back of the last page  る
1. On the last page of your notes, swipe (move your finger) in the direction of the next page.

**Set up a template for your notes**
Sets whether you want to select a template when you create a note, or use a specific template without selecting it.

1. (Home button) until there is a feeling of "click", in the order of "Settings" → "Body Settings" on your computer.
2. Tap "Template notes" and select a specific template or "Template every time you create a note" select the "Select".

---

</tr>
</thead>
<tbody>
<tr>
<td><strong>Backup はる</strong></td>
</tr>
</tbody>
</table>

In case a file stored in Cuaderno is corrupted or you destroy it, ⇒ you must always back up to the user's box.

1. Connect the PC to Cuaderno.
2. パソコンで「Digital Paper PC App」を起動します。
3. Click Folders to open the Body Memory folder at the top of Cuaderno.
4. Select all folders and documents in the Body Memory folder.

5. (Remove from electronic paper) and select the folder (destination) on your computer.

If you drag the file/folder selected in step 4 to the folder (destination) on your computer, you can still back up in the same way.

Heavy to

If you back up the same file to the same folder, the pdf file name ends so that the previous file is not overwritten. に (1) and will be saved with .

Do not specify the folder that you want to use for backup as a sync folder in Cuaderno.
If you specify it as the Synchronization folder, the file is deleted because it updates to the state of the file in Cuaderno. Please use the "Sync" folder and the "Backup" folder separately.

If you turn off wi-fi or Bluetooth or unplug a USB cable during the transfer, your data may be corrupted. 破損するおそれがあります。

You can transfer up to 1 GB of file size per file.

56
5. Sync your PC with Cuaderno ね
You can use the Digital Paper PC App to folder a specific folder on your computer and a specific folder in Cuaderno.

Share the latest on your computer or in Cuaderno.
Heavy to
Do not specify the folder that you want to use for backup as a sync folder in Cuaderno.
If you specify it as the Synchronization folder, the file is deleted because it updates to the state of the file in Cuaderno.
Please use the "Sync" folder and the "Backup" folder separately.

Basically, it reflects the latest actions you've taken on both the Cuaderno and your computer's PDF files.
The following illustration shows an example of synchronizing, making changes in Cuaderno and pc, and then synchronizing.
Become the modified PDF file.
If you delete it with either, it will no longer exist in both.
Personal computers and Cuaderno each have the same PDF file on the Cuaderno side.
Saved as an alias.
Even if you delete it with either, on the other hand, you can change the write, etc.
the PDF file that has changed remains.
Whichever you add it, it will be added to both.
Whichever you add, it will be added to both.
* The sync folder between Cuaderno and your computer is in this state.

57
Notes on synchronizing
- Only folders and PDF files under the folders that you set up are synchronized. If there are no PDF files, ル is not synchronized.
- Synchronization cannot be set/unsynchronize during the synchronization process. You can't also operate the pen in Cuaderno.
- Unsynting does not delete folders or files stored in Cuaderno or on your computer.

Set the folder on ね your computer to sync
1. Connect the PC to Cuaderno.
2. パソコンで「Digital Paper PC App」を起動します。
3. In the Digital Paper PC App, select the folder you want to sync and click (set the destination folder) を Click.
When the confirmation screen appears, click "Select folder".
4. Select a folder on your computer on the folder selection screen.
If the synchronization settings are successful, the target folder/document/note icon is it will change to.
5. 「
Click Sync.
If the most recent synchronized time is
Sync to the right.

**Update the contents of a synchronized folder**

Connect your computer to Cuaderno and sync automatically immediately after you start The Digital Paper PC App.
If you want to synchronize manually, do the following:

- Click Sync.

**POINT**
You can set it to sync automatically at regular intervals when you are connected to your computer and Cuaderno(→ P.63).

Your purchase settings sync once every 60 minutes.

**Remove sync settings**

- Right-click the folder that is set up in Digital Paper PC App, and then click "Unsynchronize".
To do this, click Ok.

---

58

6. Digital Paper PC App で検索する

**Search for documents and folders**

Use the Digital Paper PC App to set the folder/file name in The Cuaderno, or to the document. You can search for the title/author you are using.

- 1 Connect the PC to Quaderno.
- 2 パソコンで「Digital Paper PC App」を起動します。
- 3 Set the search scope.
  - If you want to search all documents, click Document List.
  - If you want to search within a specific folder, click "Default" and select the folder you want to search.
- 4 Click "File Information", enter a string in the "File name, title, author" field, and click "Search".
  - Click.
- 5 Double-click one of the search results.
When you select a folder, the documents in the folder appear in the Digital Paper PC App.
When you select a document, it opens in the PDF viewing app on your computer.

**Close the list of search results**

- 1 Click Close Search Results.

**Find documents that have written specific marks**

- 「Digital Paper PC App」 で
  - And select a specific mark and the document in cuaderno that contains the mark.
  - search for the
- 1 Connect the PC to Quaderno.
- 2 パソコンで「Digital Paper PC App」を起動します。
- 3 Set the search scope.
  - If you want to search all documents, click Document List.
  - If you want to search within a specific folder, click Folders and select the folder you want to search.
- 4 After clicking "Mark", 、
  - And select the mark you want to search for one of the "Search" on your computer.
  - Displays the document that contains the mark.
Even if there are multiple relevant parts of a document, the search results are displayed as a single document.
Point
Depending on how you write your handwriting, it may not be recognized correctly.

5 Double-click one of the search results.
The document opens in the PDF viewing app on your computer.

Close the list of search results
1 Click Close Search Results.

59

7. Change the Document/Folder Configuration of Cuaderno

Use the Digital Paper PC App to create folders in Cuaderno, rename folders/documents.
You can move/copy/delete.

Notes on changes
- If you use some special characters in folder or file names, you may not be able to display them correctly.
- If you want to copy folders or documents to your computer, see copy with the "Take Out" function.
- Files and folders that you cut and copied on your computer cannot be pasted into the Digital Paper PC App.
- If you rename or move a folder on a computer that you have set up to sync, the synchronization settings will be excluded. If you want to continue to synchronize, please do "Set destination folder" again.

How to change
It operates in the document folder list of "Digital Paper PC App".
1 Connect the PC to Cuaderno.
2 パソコンで「Digital Paper PC App」を起動します。
3 Click Folder or Document List to edit the folder/document list to display the.
   When moving, copying, or creating a folder, click Folders to display the folder.
   To create a folder
   1 View the hierarchy where you want to create a folder, and then click (New Folder), and then click and click OK.
   Change the folder name/file name
   1 Select Folder/Document, right-click, click Rename, and then click Folder Name / Type a file name and click OK.
   Move/Copy
   1 Select a folder/document, right-click, and click Cut (in electronic paper) / Copy (電 in the child paper).
   2 Display the destination folder, right-click, and click "Paste (in electronic paper)" on your computer.
   Delete 削除する
   1 Choose Folder > Document and click (Delete).
8. Add/Remove/Rename Notes Templates
You can use the Digital Paper PC App to add a template for notes to Cuaderno. Delete a template or rename the template.

POINT
Pdf files with passwords cannot be added as templates.
Multi-page PDF files are registered as templates on page 1 only.

Add a template
1 Connect the PC to Cuaderno.
2 连接 PC 到 Cuaderno.
3 「Digital Paper PC App」を起動します。
4 Click Settings to display the "Settings" screen.
5 Under Note Templates, click Add.
6 After clicking "Select File", on your computer, you can use the PDF file that you want to use as a template.
7 select the system.
8 Enter a template name and click OK.

Delete the template
1 Under Note Templates, select the template and click Delete.
2 Change the name of the template
1 Under Note Templates, select a template and click Rename.
2 Enter a template name and click OK.

9. View documents on your computer
You can open documents stored in Cuaderno in the PDF viewing app on your computer.
1 Connect your PC to Cuaderno.
2 连接 PC 到 Cuaderno.
3 Double-click the document you want to view.
4 The PDF viewing app on your computer is launched and the document is viewed as read-only.
The document is temporarily stored on your computer, but will be deleted when you exit the Digital Paper PC App.

10. Operating multiple Quadernos
The Digital Paper PC App allows you to operate multiple Cuadernos. You can switch and operate, or unpair with the currently paired Cuaderno.
Heavy to
Do not operate during synchronization.

Pair the second Quaderno
1 Connect the Cuaderno you want to add.
2 On the menu bar, click Tools > Switch Electronic Paper.
3 When prompted, click Yes.
4 When the Switch Electronic Paper window appears, click Add.
After this, follow the instructions on the screen to pair. If you see a security warning screen during pairing, click Yes to install the certificate.

Switch between multiple Cuadelnos

How to do this when two or more are paired.

Connect the Cuadelno you want to switch.

2 Select the device ID of the Cuadelno you want to work with in the Switch Electronic Paper window.

3 Click Toggle.

Unpair

1 Connect the Cuadelno you want to unpair.

2 In the Switch Electronic Paper window, click Delete.

11. Change settings in the Digital Paper PC app

Use the Digital Paper PC App to change the Cuadelno settings.

1 Connect the PC to Cuaderno.

If you want to change your Wi-Fi network settings, connect with a USB cable.

2 Connect the Cuadelno you want to change the settings for.

3 Click "Settings" and set each item.

Setting terms

- Paired e-paper
  - Displays information about paired Cuadelno. To pair another Cuadelno, see Re-Pairing.
  - Click Settings.
  - Heavy to
    - Click Reset Pairing and pair another Cuaderno to unlock the sync settings.
  - Bluetooth automatic connection (Windows only)
    - Do you want to automatically connect to Bluetooth paired Cuadelno when you launch the Digital Paper PC App?
      - To set the:
        - Automatic phase
          - Sets whether to automatically sync with connected Cuadelno while using The Digital Paper PC App.
            - Spaces
              - Sets the interval between automatic synchronizations.
            - Note balance
              - Add a default template to Cuaderno, or delete or rename the template.
            - Wi-Fi
              - Set whether you want to connect to Cuaderno and Wi-Fi.
              - List of saved Wi-Fi networks
                - Add the Wi-Fi network that Cuaderno connects to, or edit/delete the settings for the saved Wi-Fi network.

You can only set up a Wi-Fi network with Wi-Fi turned on.

POINT

You can store up to 20 Wi-Fi networks in Cuaderno.

Cuaderno supports WPA2-PSK(AES) and 802.1x EAP (TLS/PEAP) security methods. Of your

Check the user's manual for the wireless LAN router to see if the same security method is supported by the wireless LAN router.

General settings

Click Edit to edit each item.

User name
The author name of the writer is used as the user name set here.
Date display type
Sets the display format for the date.
Time display type
Sets the display format for the time.
Time zone
Set the time zone.
"Auto Sleep"
Sets the amount of time before Cuaderno enters sleep mode.
POINT
When you connect Cuaderno to the Digital Paper PC App, it's automatically set to the time on your computer. Manually change settings.
You can't.

1. Kuaderno's Tiger Bulle

I can't turn it on.

• Power button
If the charging light flashes red three times, there is no battery level. Zoe
Connect USB the Cuaderno to your computer with the USB cable that is attached to charge it.
• Cuaderno cannot be turned on when the battery is completely running low. Attached USBケー
When you connect the Cuaderno to the PC in the bull and charge it, the Cuaderno turns on.
• If the attached USB cable is plugged in to charge, but the power button  and press.
When the battery is completely running low, it may take about 5 to 10 minutes from the time you start charging to the time the power is turned on.

There is.

- When cuaderno is condensing, the power may not turn on. Wait a few hours before turning it on.

I can't charge.

- Use the attached USB cable to charge. When charging with other products, performance and safety are guaranteed.
- If you are using a USB hub, do not use a USB hub, connect the USB cable directly to the PC and Cuaderno if you want to.
- Make sure your computer is turned on. Depending on the model and situation, your computer may be in sleep mode or休眠 if it is turned off or turned on, it will not charge. While charging, so as not to sleep mode, please change your computer settings. In addition, when charging with a notebook pc, be sure to contact the pc with the power supply.
- Charge within the recommended temperature range (5°C to 35°C). If charging is outside the recommended temperature range, disconnect the USB cable from the cable, put it back within the recommended temperature range, and then connect the USB cable again to charge it.

It's a good place to be.

Battery consumption feels faster

- Make sure the charge is fully complete. Press (home button) until there is a feeling of "click".
- When the battery icon in the upper right corner of the home menu switches, charging is complete.
- If the ambient temperature operating cuaderno is less than or equal to 5°C, battery consumption may be accelerated, but it is not.
- Cuaderno also consumes batteries in sleep mode. It is recommended that you turn off the power completely when not in use.
- The battery will be consumed if the Cuaderno is left unattended for a long time even when the power is turned off. Charge it before you use it.
- Turn off Wi-Fi when you're not using the network. (home button) as "click" tap"Wi-Fi" to uncheck it.
- Turn off the Bluetooth feature when you're not connected to Bluetooth. (home button) as "click" tap"Bluetooth" to uncheck it.
- When the computer is in three-p mode, standby mode, or hibernation, even if it is connected to the computer, Adelno may not be charged and consumes batteries. To prevent the computer from sleep mode, etc.

Please.

- The battery life of the specifications described in the "Specifications List" in the catalog, web site, and "instruction manual" is set to the time at which the frequency of use is set.
- Battery life varies depending on the operating environment and frequency of use.
- Battery consumption is faster in the following cases:
  - Write by hand frequently.
  - Frequently highlight.
- Search documents frequently.

66

Display documents with many images.

Use Cuaderno with "Wi-Fi" set on. or maintain a Wi-Fi connection while in sleep mode.定

It has been.

After selecting "Wi-Fi Settings" in "Settings", leave the "Saved Network List" displayed.

Use Bluetooth Cuaderno by setting "Bluetooth" on. or maintain a Bluetooth connection when in sleep mode.

It is set to.
Leave the pen on top of the screen.

**It takes a long time for the screen to appear.**
- It may take some time to display in extremely cold places.

**If the screen is not displayed,**
- The screen is not displayed and the power button ( 
If it does not respond even if you perform a pen operation, please reset it. Fine button(RESET) with a pin or clip. Next, the power button ( ) to restart.
When reset, the contents of the writing and notes on the document and the setting information may be deleted, so please note Please do your mind.

**The touch panel is slow to respond.**
- The screen may be dirty. Gently wipe the screen with a soft cloth.
For more information, see Problems getting in from ScanSnap (→ page 74),
Reset Botan
Power Botan
(The illustration is for QUADERNO A4.)

**2. Stylus Pen Trable**

The stylus pen can't be operated.
- If the pen battery is low, you may not be able to operate it with a stylus pen. With the attached USB cable, ス
Connect the stylus pen to your computer to charge it. While charging, the charging light turns red.
Be careful not to touch the core of the tip of the pen. When you connect the USB cable with the tip of the pen pressed, ．
The pen operation is not possible. If so, reconnect the USB cable.
- The pen cannot be operated during 同期中はペン 、synchronization.
- If you keep the USB cable connected to the Cuaderno, the touch panel may be less sensitive.
Unplug the USB cable when charging or synchronizing is complete.

**The tip of the pen is actually out of position.**
Set how you want the stylus pen to hold and compensate for the deviation between the position where the stylus pen is applied and the written position.
Press (home button) until there is a feeling of "click", "Settings"→"Body Settings"→"Pen tip position adjustment" の Tap in order to adjust.

If you draw a line diagonally with a ruler, etc., the line will wave.
Characteristics of capacitive pens and panels. Thank you for your understanding.
The stylus pen uses a capacitive system, and when you place a dielectric such as a ruler on the screen and draw a diagonal line, it waves. will be shown. Vertical and horizontal straight lines can be written straight.

**When the core of the stylus pen is worn out,**
The tip of the pen wears out while using it.
If the tip of the pen is less than 1.5 mm, it is recommended to replace it.
Use the following procedure to change the core of the stylus pen.
1 Firmly insert the base of the tip of the pen with a core pull out straight from the pen.
2 Check the orientation of the replacement core and insert it straight into the pen with the core punch.
1.5mm (1/16in)

3. Network Travel

Can't set up/connect to a Wi-Fi network

- Cuaderno's List of Saved Networks includes only the Wi-Fi networks added in the Digital Paper PC App. You'll see. If you don't see the Wi-Fi network you want to connect to in the Saved Networks List, click "Add".

Add a Wi-Fi network using the Paper PC App.
1. Connect your computer to Cuaderno with the attached USB cable and start Digital Paper PC App.
2. 「Settings→Click "Add" under "Saved Wi-Fi Network List" and follow the screen.」
3. Cuaderno's List of Saved Networks includes only the Wi-Fi networks added in the Digital Paper PC App.
   - If you don't see the Wi-Fi network you want to connect to in the Saved Networks List, click "Add".
   - 「Settings→Click "Add" under "Saved Wi-Fi Network List" and follow the screen.」

Add a Wi-Fi network.
3. Cuaderno's List of Saved Networks includes only the Wi-Fi networks added in the Digital Paper PC App.
   - 「Settings→Click "Add" under "Saved Wi-Fi Network List" and follow the screen.」

Then connect to the Wi-Fi network.
- Turn on Wi-Fi capability. Press (home button) until there is a feeling of "click", "Settings"→"Wi-Fi settings"→【"Keep】
- 「Update the list of networks that you have.」
- 「If you have low battery charges in Cuaderno, you may not be able to connect to a Wi-Fi network.」
- 「I charged Cuaderno.」
- 「Then connect to the Wi-Fi network.」
- 「Then connect to the Wi-Fi network.」

Check the security method and IP address.
- 「When using MAC address filtering on a wireless LAN router, アドレスのフィルタリングを使用するときは、クアデルノ」
- 「(home button)」
- 「Press until there is a feeling of "click", tap "Settings"→"Body information"→"Equipment information" to select the MAC address.」
- 「Please check. Then register LAN the Cuaderno MAC address with the wireless LAN router.」
- 「Verify that the network settings on the wireless LAN router are correct.」
- 「For information about setting up a wireless LAN router, see 無」
- 「Refer to the user manual for the line LAN router or check with your network administrator.」
- 「It is possible that Cuaderno is too far away from the wireless LAN router.」
- 「Please move to a place close to.」
- 「There are obstacles such as walls, metal, and concrete between the Cuaderno and the wireless LAN router, which adversely affects the connection.」
- 「There is a possibility that there is.」
- 「Move Cuaderno to another location.」

Turn off the radio function of those devices or move The Cuaderno to another location.
If you set the wireless LAN router to not display the SSID (stealth setting), Wi-Fi does not appear in the list. Manually set up a Wi-Fi network.

If your Wi-Fi network suddenly becomes unavailable, たん

If you have low battery charges in Cuaderno, you may not be able to connect to a Wi-Fi network. I charged Cuaderno.

Then connect to the Wi-Fi network.

The Bluetooth connection suddenly bened たん

If the battery level in Cuaderno is low, you may not be able to connect. After charging The Cuaderno, you can connect to Bluetooth.

Please.

Delete the pairing information once, and then try pairing again.

You can connect up to four PCs. If you are trying to connect to a fifth computer, disconnect from the connection that you do not need.

Please.

It is possible that cuaderno is too far away from the PC. Move Cuaderno closer to your computer.

If you want to.

Ability to have obstacles such as walls, metals, or concrete between The Cuaderno and the PC, adversely affecting connectivity. There is. Move Cuaderno to another location.

2.4 GHz band wireless devices around Cuaderno (cordless phones, microwave ovens, Bluetooth devices, etc.) may be affected by radio waves. Turn off the radio function of those devices or move The Cuaderno to another location.

Please.
• When you initialize Cuadelno, Bluetooth pairing information is also removed. The pairing information that remains on the computer is removed once and then Bluetooth pair again.

• In the case of Windows, you may be able to connect to Bluetooth by using Cuaderno as an access point. Right-click “Bluetooth” in the notification area, click “View Bluetooth Device” to display “Digital Paper (Bluetooth Connection)” is displayed as “Paired”.

1. Right-click Bluetooth in the notification area, and then click Join Personal Area ネットワークへの参加 Network.
2. Right-click when the Bluetooth paired Cuaderno appears, and click “How to Connect” → “Access Point” の Click, and then click.

4. Document Travle

If you cannot view the document,

● Only PDF files that conform to the PDF 1.7 specifications are available. Adobe extension level 1-8 extensions included. PDF is not supported.

If the character is not displayed, the T: System: Windows: Text

● User-defined characters and special symbols may not be displayed.

Can’t write

● If the battery level of the pen is low, it may not be possible to write. Charge the pen.
● If the document is protected, it cannot be written.
● If the amount of free space in the main body memory is small, the document will open with "read-only", so it will not be possible to write. Unnecessary 要 free up space by deleting the document.
● Documents read by the scanner (the entire page is image data) or characters embedded as images. イ You cannot turn on the light.
● 「When operating Cuaderno with the Digital Paper PC App, you may not be able to write temporarily.」 in the same world. Please wait until the operation is over.

Cannot edit or delete a write

● If “Edit Write Restrictions” is enabled, writes other than your Cuaderno can be き Not. To be able to edit, press (home button) until you feel “click” to set “Settings” を Tap to disable Write Edit Restrictions.
● If the pen has low battery charges, you may not be able to edit or delete writing. Charge the pen.
● If the document is protected, you cannot edit or delete the write.
● If the amount of free space in the main unit memory is low, the document will open with "read-only", so you can edit or delete writes.

Not. Free up space by deleting unnecessary documents.
● 「When you are operating Cuaderno with the Digital Paper PC App, you will not be able to temporarily edit or delete writes.」 And there is. Please wait until the operation is over.

5. Connection to a pc

Cuaderno is not recognized on the computer.

● It may take some time to recognize Cuaderno.
● Make sure that the correct application is installed on the target OS. Desktop Aikon is the “Digital Paper PC App” and personal computers are eligible. The Please make sure that. 対象 OS は「Digital Paper PC Appの動作条件」（→ P.79）で確認してください。
● When setting up pedaling, connect your computer to the Internet.
● If you are using more than one Quaderno, in the "Digital Paper PC App", click "Tools" → "Switch electronic paper" の
Click in order and select the device ID of the Kauderno you are connected to.
Or delete the device ID information once and try to reconfigure it.
The equipment ID is in Cuaderno. の
(Home button) to press until there is a feeling of "click" to "Settings" → "To this device
→→ Click "Equipment Information" to confirm.

Confirm usb cable connection の
● Use the attached USB cable. For use other than the attached USB cable, performance and safety I do not testify.
● Unplug the USB cable and plug it back in. In addition, the battery in the upper right corner of The Cuaderno's home menu ー
Icon ( ) is charging.
● If you connect your PC to electronic paper via a USB hub, we will not guarantee the operation. The included USB cable の
Connect "directly" in .
● Try connecting to another USB terminal on your computer. In addition, if there is another pasokon, the contact on another personal computer 続
Check to see if you can.
When it still doesn't connect は
● Power button ( ) for about 3 seconds to turn it off and turn it back on.
● Reinstall the Digital Paper PC App to see if it will be improved or not.
● If you try the above items and it doesn't work, disconnect the Cuaderno and your computer once and ど
press reset (reset button). Then the power button ( ) to restart the attached USB ケーブル
connect your computer to Cuaderno. When reset, the contents of the writing and notes on the document, information may be deleted.

List of specifications

1. Cuadel no
The specifications of this product are subject to change without notice for improvement. Please understand in advance.
Name
4-A-4 NOTEBOOK
5-A-5 NOTEBOOK
Type Name
FMV-DPP03、または FMV-DPP01
FMV-DPP04、または FMV-DPP02
Display イ
13.3 型
10.3 型
Flexible e-paper
Resolution 度
1650×2200 ドット
1404×1872 ドット
Order
16-tone grace cake
Touch pane le
Capacitive pen input compatible touch panel ル
Memory capacity / Available territory 域
16 GB / 約 11 GB
Interfeas
microUSBコネ克拉
Electric
Source
Guan
System
Charging pool
Built-in lithium-ion charging battery
During charging
約 5.5 時間（USB 充電）
Rechargeable battery duration (operating time)
Wi-Fi能: 最3週 3 注1
Wi-Fi能: 最1週 注2
Recommended temperature of operation and charging
5 °C ~ 35 °C
無線LAN 注 3
Communication method
IEEE 802.11a/b/g/n/ac MIMO
Frequency band used
2.4 GHz x 5 GHz 帯
Cryptography
WPA2-PSK（AES）、802.1x EAP（TLS/PEAP）
How to connect expression
WPS（Wi-Fi Protected Setup）／手動
認証Wi-Fi
Response 応
Bluetooth
Communication method
Bluetooth 標準規格 Ver4. 2
Frequency band used
2.4GHz 帯
NFC 注 4
Frequency band used
13.56 MHz 帯
How to respond Expression
