

Tolino Vision 2

Conclusion: **Bad**

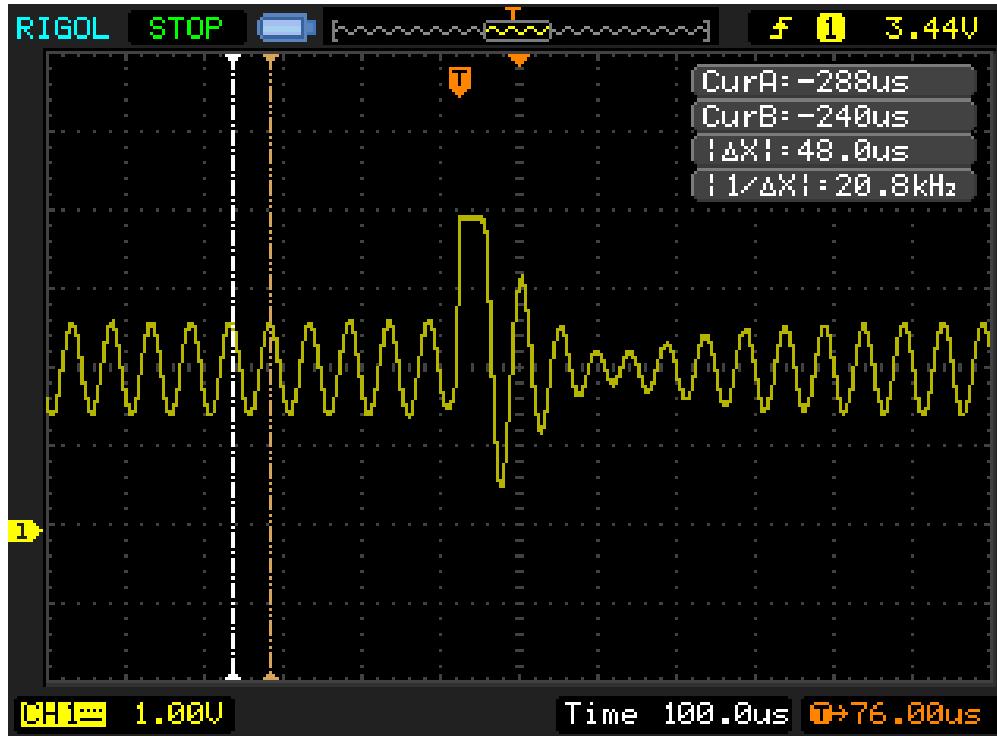

Frontlight level: 60%
Ripple frequency: 20.8 kHz
Ripple coefficient: 11%
Ripple pattern: constant

Frontlight level : 30%
Ripple frequency : 20.8 kHz
Ripple coefficient : **100%**
Ripple pattern : constant, with a slight periodical decrease in the amplitude

Kobo Aura H2O (N250)

Conclusion : Sufficient

Frontlight level: 50%

Ripple frequency: 20.8 kHz

Ripple coefficient: 30%

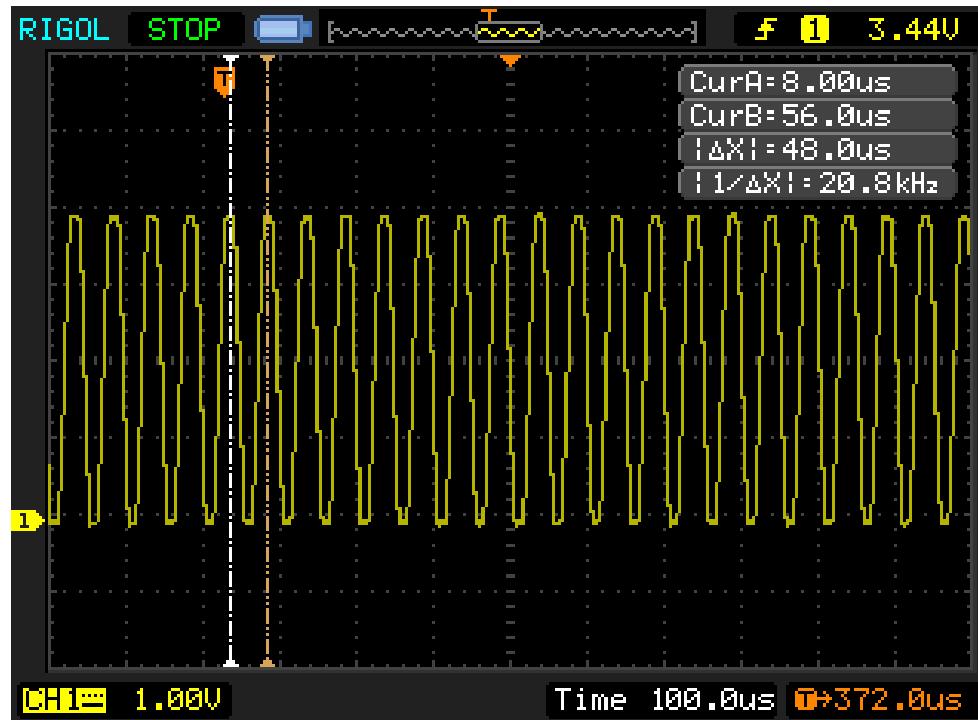

Ripple pattern: constant, with periodical bursts

Ripple coefficient during bursts: 82%

Ripple frequency: not defined (< 1 kHz)

Kobo Aura (N514)

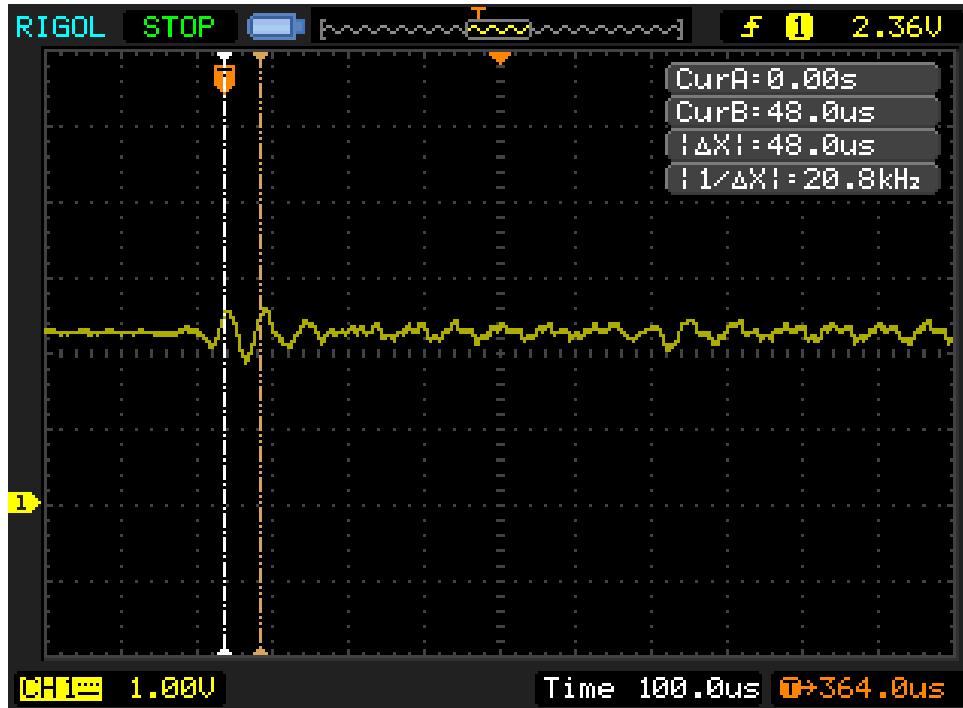

Conclusion: **Very bad**

Frontlight level: 50%
Ripple frequency: 20.8 kHz
Ripple coefficient: **100%**
Ripple pattern: constant

Amazon Kindle Voyage

Conclusion: **Good**

Frontlight level : 50%

Ripple frequency : 20.8 kHz

Ripple coefficient: 2%

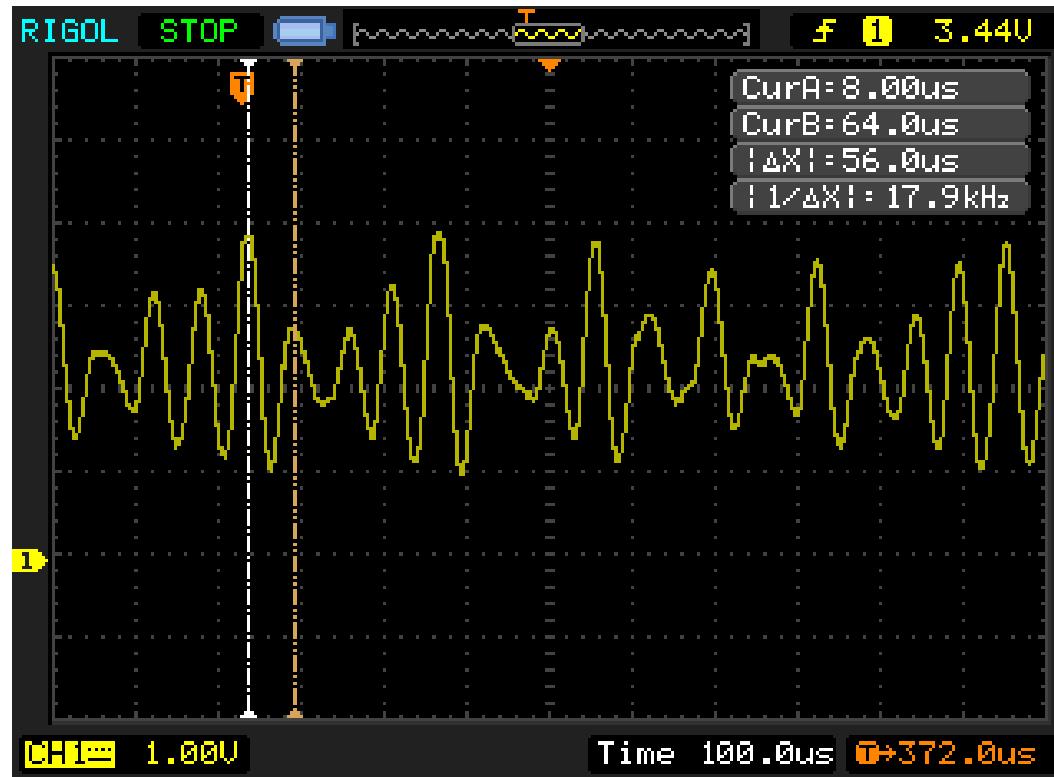

Ripple pattern: constant, with periodical bursts

Ripple coefficient during bursts: 13%

Ripple frequency: **not defined (< 1 kHz)**

Bookeen Cybook Odyssey HD

Conclusion : Sufficient

Frontlight level: 50%

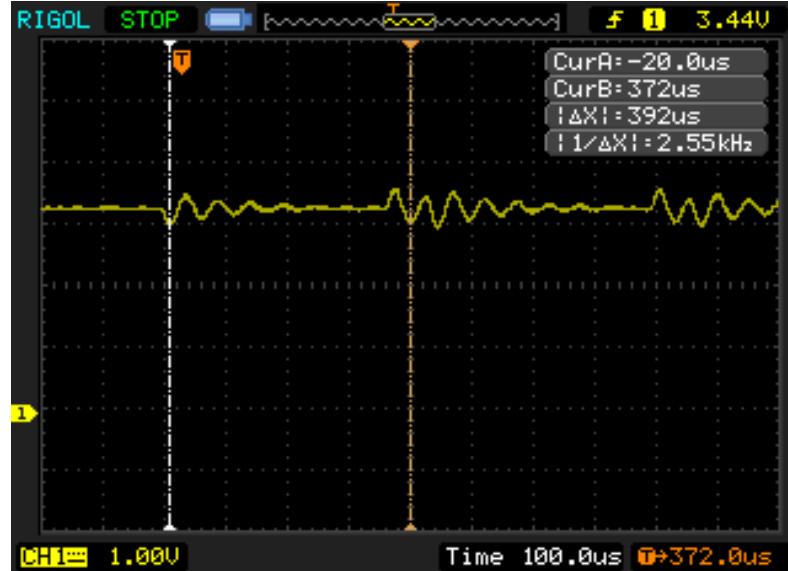

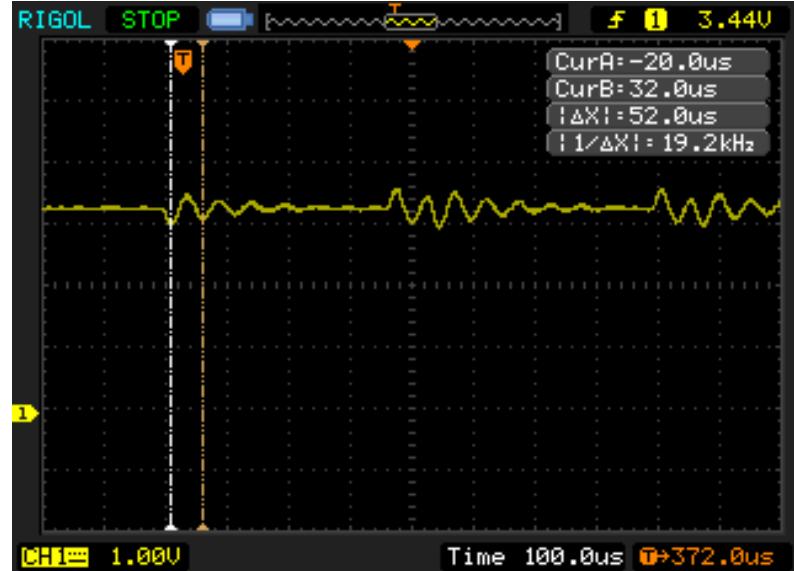

Ripple frequency: 17,9 kHz

Ripple coefficient: 58%

Ripple pattern: constant, with a random variation of the amplitude within the boundary values

PocketBook Sense

Conclusion: Good

Frontlight level: 50%

Ripple frequency: 19,2 kHz

Ripple coefficient: 2%

Ripple pattern : constant, with periodical bursts

Ripple coefficient during busrts: 9%

Busrts frequency: 2,55 kHz

Device	Brightness level when measured	Constant ripples				Maximum periodical ripples (groups)				Preliminary conclusion
		Ripple frequency, kHz	Maximum measured value, V	Minimum measured value, V	Ripple coefficient	Frequency of groups' appearance, kHz	Maximum measured value, V	Minimum measured value, V	Ripple coefficient	
Tolino Vision 2	60%	20,8	2,0	1,6	11%	no				Bad
